Certificate of the Supervisor	(i)
Acknowledgement	(ii–iii)
Contents	(iv–vi)
List of Publications	(vii)
Enclosure : Published Papers	
CHAPTER-1 :	
Scope and Object of the Research	1-8
1.1 Choice of the main solvent used	2
1.2 Scope of the Work	3
1.3 Methods of Investigation	3
1.4 Summary of the work done	4
References	
CHAPTER – II :	
Introduction of Review of the Earliar Works	9-41
2.1 The Importance of Solution Chemistry	9
2.2 Thermodynamics of Ion-pair Formation	10
2.3 Viscosity	13
2.3.1 Division of B-coefficients into Ionic values...	14
2.3.2 Thermodynamics of Viscous Flow	16
2.3.3 Effects of Shape and Size	16
2.4 Conductance	17
2.4.1 Ionic –Association	18
2.4.2 Ion-Size Parameter and Ionic Association.....	21
2.4.3 Limiting Ionic Equivalent Conductances.....	22
2.4.4 Solvation Number	24
2.4.5 Stokes' Law and Walden's Rule	24
2.4.6 Recent Conductivity Equations	25
2.5 Apparent and Partial Molar Volumes	28
2.6 Ultrasonic Velocity	28
2.7 Some Recent Trends in Solvation Methods	30
References	
2.8 Viscous Antagonism and Synergy	31
CHAPTER – III :	
Experimental Section	42-47
3.1 Chemical used – their Sources and Purification....	42
3.2 Experimental Technicues	43
3.2.1 Density Measurements	43
3.2.2 Viscosity Measurements	44

3.2.3	Conductance Measurements	45
3.2.4	Ultrasonic Velocity Measurements	45
	References		

CHAPTER – IV :

	Study of Ion-Solvent Interactions of Some Alkali Metal Chlorides in Tetrahydrofuran + Water Mixtures at Different Temperatures.	48-94
4.1	Introduction	48
4.2	Materials and Methods	49
4.3	Results and Discussion	50
	References		
	Graphical Representation	71

CHAPTER – V :

	Electrical Conductances of Tetraalkylammonium and Alkali Metal Salts in Aqueous Binary Mixtures of Tetrahydrofuran at Different Temperatures	95-114
5.1	Introduction	95
5.2	Experimental Section	96
5.3	Results and Discussion	97
	References		
	Graphical Representation	112

CHAPTER – VI :

	Excess Molar Volume, Grunberg-Nissan Parameters and Viscosity Deviation of Binary Mixtures of Tetrahydrofuran with Benzene and n-hexane at Various Temperatures	115-133
6.1	Introduction	115
6.2	Experimental	116
6.3	Results and Discussion	117
	References		
	Graphical Representation	130

CHAPTER – VII :

	A Study on Ion-Solvent Interactions of Some Sulphate Compounds in Aqueous Tetrahydrofuran at Different Temperatures	134-175
7.1	Introduction	134
7.2	Results and Discussion	135
7.3	Experimental	142
	References		
	Graphical Representation	164

CHAPTER – VIII :

Studies on Density, Viscosity and Some Mixtures of Normal Hexane with Some Polar and Non-Polar Solvents at different Temperatures	176-203
8.1 Introduction	176
8.2 Results and Discussion	177
8.3 Experimental	180
References	
Graphical Representation	186

CHAPTER – IX :

Ion-Solvent and Ion-Ion Interactions of Resorcinol in Mixed 1,4-Dioxane- Water Systems at Different Temperatures.	204-219
9.1 Introduction	204
9.2 Experimental	205
9.3 Results and Discussion	206
References	

CHAPTER – X :

Ion Association and Ion-Solvent Interactions of Some Ammonium and Tetraalkylammonium Salts in Binary Mixtures Containing Tetraalkylammonium and Water at 298.15K Using Conductometric Technique.	220-235
10.1 Introduction	220
10.2 Results and Discussion	221
10.3 Experimental Section	225
References	
Graphical Representation	234

CHAPTER – XI :

Concluding Remarks	236-240
---------------------------	----------------
