

Contents

| Chapters | Particulars | Pages |
|--------------------|---|---------|
| | Preface | I-V |
| | List of tables and appendices | VI-VIII |
| | List of figures and plates | IX-XI |
| CHAPTER I | Introduction | 1-8 |
| | 1.1 Lake ecosystem | 3 |
| | 1.2 Sikkim biodiversity and ecotourism project | 6 |
| | 1.3 Core Hypotheses | 7 |
| | 1.4 Objectives | 8 |
| CHAPTER II | Review of literature | 9 |
| CHAPTER III | Study area | 20 |
| | 3.1 Sikkim | 20 |
| | 3.2 Khecheopalri Lake | 22 |
| | 3.2.1 Sacredness and legends | 22 |
| | 3.2.2 Physical features | 26 |
| | 3.2.2.1 Location, lake formation and physiography | 26 |
| | 3.2.2.2 Geology | 27 |
| | 3.2.2.3 Soil | 28 |
| | 3.2.3 Climate | 29 |
| | 3.2.3.1 Rainfall | 29 |
| | 3.2.3.2 Temperature | 29 |
| | 3.2.4 Lake, bog and watershed vegetation | 30 |
| CHAPTER IV | The human dimension | 36 |
| | 4.1 Introduction | 36 |
| | 4.2 Materials and methods | 37 |
| | 4.3 Results and discussion | 39 |
| | 4.3.1 Human drivers | 39 |
| | 4.3.1.1 Population structure | 39 |
| | 4.3.1.2 Occupational structure | 40 |
| | 4.3.1.3 Agricultural production | 40 |
| | 4.3.1.4 Animal husbandry | 41 |
| | 4.3.2 Tourism growth | 41 |
| | 4.3.3 Religio-cultural feature | 43 |
| | 4.3.4 Garbage | 43 |
| | 4.3.5 Resource extraction | 44 |

| | | |
|--------------------|--|------------|
| | 4.3.5.1 Fuelwood | 44 |
| | 4.3.5.2 Fodder, grazing and browsing | 47 |
| | 4.3.6 Conservation initiatives | 47 |
| CHAPTER V | The lake watershed | 55 |
| | 5.1 Introduction | 55 |
| | 5.2 Materials and methods | 57 |
| | 5.3 Results | 63 |
| | 5.3.1 Land-use/cover change | 63 |
| | 5.3.2 Forest structure, composition and productivity | 64 |
| | 5.3.2.1 Biological spectrum | 64 |
| | 5.3.2.2 Tree structure and its regeneration | 64 |
| | 5.3.2.3 Woody biomass and its productivity | 66 |
| | 5.3.2.4 Ground vegetation and its productivity | 66 |
| | 5.3.3 Overland flow, soil and nutrient loss | 67 |
| | 5.3.4 Precipitation partitioning | 68 |
| | 5.3.5 Faunal composition | 69 |
| | 5.4 Discussion | 70 |
| CHAPTER VI | The peatland | 96 |
| | 6.1 Introduction | 96 |
| | 6.2 Materials and methods | 98 |
| | 6.3 Results | 101 |
| | 6.3.1 Peatland formation and carbon dating | 101 |
| | 6.3.1.1 Peat stratigraphy | 102 |
| | 6.3.1.2 Age determination | 103 |
| | 6.3.2 Terrestrialization | 104 |
| | 6.3.2.1 Biological spectrum | 105 |
| | 6.3.2.2 Vegetation composition and biomass | 105 |
| | 6.3.2.3 Peat standing biomass and exogenous supply | 107 |
| | 6.3.3 Nutrient dynamics | 108 |
| | 6.4 Discussion | 108 |
| CHAPTER VII | The lake | 128 |
| | 7.1 Introduction | 128 |
| | 7.2 Materials and methods | 129 |
| | 7.3 Results | 136 |
| | 7.3.1 Hydrology | 136 |
| | 7.3.1.1 Precipitation, discharge and sedimentation | 137 |
| | 7.3.2 Nutrient dynamics | 138 |
| | 7.3.2.1 Lake | 138 |
| | 7.3.2.2 Bog | 141 |

| | |
|--|------------|
| 7.3.3 Plankton composition and seasonal dynamics | 142 |
| 7.3.3.1 Seasonal distribution and the similarity index of plankton | 142 |
| 7.3.3.2 Plankton bio-volume | 144 |
| 7.3.3.3 Seasonal population density and biomass | 146 |
| 7.3.3.4 Diversity indices | 147 |
| 7.3.4 Plankton productivity and respiration | 149 |
| 7.3.5 Faunal composition | 150 |
| 7.3.5.1 Migratory birds | 150 |
| 7.3.5.2 Fishes | 150 |
| 7.3.5.3 Amphibians and insects | 151 |
| 7.4 Discussion | 151 |
| CHAPTER VIII General discussion and Recommendations | 185 |
| Summary | 197 |
| References | 212 |
| Appendices | XII |
| Reprints of papers published | - |
