Acknowledgements ..	(I)
Preface ..	(III)
Summary ..	(VII)
<b><u>CHAPTER - I</u></b>	<b>INTRODUCTION</b>
1.1 Primary cosmic radiation	1
1.2 Extensive air showers	2
1.3 The soft component	4
1.4 The muon component	5
1.5 The hadron component	5
1.6 Cerenkov light	6
1.7 Radio waves in EAS	7
1.8 Atmospheric fluorescent emission in air showers ..	8
1.9 Air shower simulation studies	9
1.10 Present air shower studies	10
<b><u>CHAPTER - II</u></b>	<b>A SUMMARY OF RESULTS ON ELECTRON LATERAL DISTRIBUTION IN AIR SHOWERS</b>
2.1 Introduction ..	12
2.2 Nishimura-Kamata-Greisen (NKG) function ..	12
2.3 Modification of NKG function (Akeno group) ..	14
2.4 Calculation of Capdevielle et al	17

2.5	Calculation of Lagutin et al	18
2.6	Monte Carlo calculations of Hillas et al ..	19
2.7	Experimental observations on lateral distribution of electrons	20

### CHAPTER - III THE EXPERIMENTAL ARRANGEMENT

3.1	Introduction ..	21
3.2	The air shower array	21
3.3	Electron density detectors	22
3.4	Neon flash tube chamber : Muon detector ..	23
3.5	Magnetic spectrograph units	24
3.6	The neon flash tubes	26
3.6.1	The principle of operation	27
3.6.2	The properties of neon flash tubes	28
3.7	The operation of the NFT chamber - Muon detector ..	31
3.8	Description of control electronics connected with the SAS array	33
3.8.1	Shower selection	33
3.8.2	Data acquisition, storage and transfer ..	33
3.9	Operation and response of the array system ..	34
3.10	Efficiency of the detectors	36
3.11	Maintenance and calibration of density detectors	37

	Page	
3.12	Cross calibration of the channels	39
<u>CHAPTER -IV</u>	<u>DATA PROCESSING, ANALYSIS AND ERROR ESTIMATION</u>	
4.1	Shower data analysis	41
4.2	Estimation of shower size, age and core-position	41
4.2.1	An indication to the flow chart in figure 4.1	46
4.3	Estimation of errors on shower parameters ..	46
4.4	Artificial shower analysis with initially fixed shower size and age	47
<u>CHAPTER -V</u>	<u>EXPERIMENTAL RESULTS</u>	
5.1	Efficient detection area of the array	50
5.2	Calculation of the triggering probability ..	51
5.3	Estimation of the size spectrum of showers ..	53
5.4	Determination of shower size and age	56
5.4.1	Age distribution	56
5.5	Variation of local age parameter with core distance	57
5.6	Variation of local age parameter with the shower size	57
5.7	Lateral distribution of electrons	57
5.8	Comparison of results	61

	Page
5.8.1 Comparison of structure functions	61
5.8.2 Comparison of observed and computed lateral distribution	61
5.8.3 Comparison of average shower age distributions ..	62
5.9 Discussion ..	62
