

Contents

1. Introduction.....	1
2. Review of Literature.....	5
3. Materials and Methods.....	33
3.1 Selection of pond.....	33
3.2 Collection and maintenance of healthy fish.....	33
3.3 Collection of diseased fish.....	33
3.4 Analysis of water samples.....	33
3.5 Materials for histopathological techniques.....	35
3.6 Bacterial cultures.....	37
3.6.1 Source of culture.....	37
3.6.2 Composition of bacterial media.....	37
3.7 Fungal cultures.....	41
3.7.1 Source of culture.....	41
3.7.2 Composition of fungal media.....	41
3.8 Methods for water analysis.....	42
3.9 Methods for Histopathological techniques.....	45
3.9.1 Sampling and fixation.....	45
3.9.2 Processing.....	45
3.9.3 Sectioning.....	45
3.9.4 Staining.....	46
3.10 Methods for Haematological techniques.....	47
3.10.1 Blood sampling.....	47
3.10.2 Smear preparation and staining of blood.....	48
3.10.3 Blood studies.....	48
3.11 Methods for isolation of bacteria.....	49
3.12. Pathogenicity test of isolated bacteria.....	49
3.13. Histopathology of the experimentally infected fish with bacteria.....	50
3.14. Haematological studies with pathogenic bacterial isolates.....	50
3.15 Methods for fungal isolation.....	51
3.16 Methods for sporulation of isolated fungus.....	51
3.17. Pathogenicity test of isolated fungus.....	52
3.18. Histopathology of the experimentally infected fish with isolated fungus.....	52

3.19	Morphological and biochemical test for bacterial identification....	52
3.19.1	Morphology.....	52
3.19.2	Physiological and biochemical tests.....	53
3.20	Microscopical examination of isolated fungus.....	56
4.	Observations and Results.....	57
4.1	Studies on the physico-chemical parameters of pond water.....	57
4.2	Studies on the fish affected with epizootic ulcerative syndrome...	69
4.3	Observations on the external pathological condition of the diseased fish.....	69
4.4	Histopathological observation of the EUS affected fish.....	71
4.5	Haematological observation.....	75
4.6	Isolation of bacteria and their characterization.....	77
4.7	Isolation of fungus and their characterization.....	84
4.8	Pathogenicity test of isolated bacteria.....	84
4.9	Pathogenicity test of isolated fungus.....	86
4.10	Histopathology of experimentaly infected fish with isolated bacteria.....	87
4.11	Histopathology of experimentaly infected fish with isolated fungus.....	87
4.12	Effect of isolated pathogenic bacteria on the morphology of erythrocytes, total erythrocyte count and haemoglobin content of <i>H. fossilis</i>	88
5.	Discussion.....	92
6.	Summary.....	107
7.	References.....	111
