

Contents

1. Introduction	1
2. Review of Literature	5
3. Materials and Methods.....	31
3.1. Collection of diseased fish	31
3.2. Collection and maintenance of healthy fish	31
3.3. Fungal Culture.....	31
3.3.1. Source of culture.....	31
3.3.2. Composition of fungal media.....	32
3.3.3. Methods for fungal isolation	33
3.3.4. Methods for sporulation of isolated fungus	34
3.3.5. Microscopical examination of isolated fungus.....	34
3.3.6. Effect of temperature on the growth of isolated fungus.....	34
3.4. Bacterial cultures	34
3.4.1. Source of culture.....	34
3.4.2. Composition of bacterial media.....	35
3.4.3. Methods for isolation of bacteria.....	40
3.5. Morphological and biochemical tests for bacterial identification.....	41
3.6. Inoculation of fishes with bacterial suspensions.....	44
3.6.1. <i>Channa punctatus</i>	44
3.6.2. <i>Cyprinus carpio</i>	45
3.7. Inoculation of fishes with zoospore suspension.....	45
3.8. Pathogenicity test of bacterial isolates	45
3.9. Inoculation of fishes with bacterial suspension for histopathological studies.....	46
3.10. Inoculation fishes with mixed suspension of fungal zoospore and bacteria in pure condition.....	46
3.11. Histopathology of the experimentally infected fish with isolated fungus.....	46
3.12. Materials for histopathological techniques.....	47
3.13. Methods of histopathological techniques.....	49
3.13.1. Sampling and fixation	49
3.13.2. Processing.....	49
3.13.3. Sectioning.....	49
3.13.4. Staining.....	49
3.13.5. Procedure for haematoxylin – Eosin stain.....	50

3.13.6. Procedure for Grocott hexamine silver staining for fungi.....	50
3.13.7. Procedure for periodic acid-schiff stain	51
4. Observations and Results.....	52
4.1. Observation of the fish affected with epizootic ulcerative syndrome.....	52
4.2. Histopathological observation of the EUS affected fish.....	54
4.2.1. <i>Channa striata</i>	54
4.2.2. <i>Labeo rohita</i>	55
4.2.3. <i>Lebeo bata</i>	55
4.3. Isolation of fungus and their characterization.....	56
4.4. Isolation and characterization of bacteria.....	57
4.5. Observation of external pathological symptoms of <i>Channa punctatus</i> treated with R1, R2, R3 in pure and mixed condition.....	62
4.6. Observation of external pathological symptoms <i>Cyprinus carpio</i> treated with R1, R2, R3 in pure and mixed condition.....	64
4.7. Pathogenecity test of isolated fungus	65
4.8. Pathogenicity test of isolated bacteria on <i>Channa punctatus</i>	66
4.9. Observation of external pathological symptoms of <i>Channa Punctatus</i> treated with mixed saline suspensions of zoospore of (<i>Aphanomyces</i> sp.) and bacteria R1, R2 and R3 in pure condition	67
4.10 Histopathological observations of experimentally infected <i>Cyprinus carpio</i> treated with R1, R2 and R3 bacteria in pure and mixed condition.....	69
4.11. Histopathological observations of the fish experimentally infected <i>Channa punctatus</i> treated with zoospores of <i>Aphanoyces</i> sp.....	70
5. Discussion.....	71
6. Summary.....	80
7. References.....	84
