

ABBREVIATIONS

ANOVA	Analysis of variance
BOD	Biological Oxygen Demand
cm	centimeter
CFU	Colony Forming Unit
DO	Dissolved Oxygen
Fig.	Figure
Free CO ₂	Free carbon dioxide
ft.	feet
g	gram
ha	hectare
HPC	Heterotrophic Plate Count
IUCN	International Union for the Conservation of Nature and Natural Resources
km	kilometer
L	litre
m	metre
mg	milligram
mL	milliliter
°C	degree Celsius
sq	square
S.D.	Standard Deviation
sp.	species

CONTENTS

Chapter	Page No.
INTRODUCTION	1
REVIEW OF LITERATURE	5
Physico chemical Parameters	5
Plankton	12
Bacteriology	16
MATERIALS AND METHODS	19
Sampling sites for the hydrobiological study in Mirik Lake	19
Methods of Sampling	20
Physico-chemical parameters	21
Reagents for water analysis	21
Methods for water analysis	23
Qualitative and Quantitative Estimation of Plankton	27
Phytoplanton	27
Zooplanton	28
Biological indices	29
Bacteriological analysis	31
Reagents for bacteriological analysis	31

MPN Method of Total Coliform	31
MPN Method for fecal coliform	33
Heterotrophic Plate Count (HPC)	33
OBSERVATIONS AND RESULTS	34
Air temperature and physico-chemical parameters of water of seven sites	34
Site 1	34
Site 2	45
Site 3	56
Site 4	67
Site 5	78
Site 6	89
Site 7	100
Seasonal variations in air temperature and physico-chemical parameters of water at Site 1	111
Seasonal variations in air temperature and physico-chemical parameters of water at Site 2	112
Seasonal variations in air temperature and physico-chemical parameters of water at Site 3	114
Seasonal variations in air temperature and physico-chemical parameters of water at Site 4	116
Seasonal variations in air temperature and physico-chemical parameters of water at Site 5	118
Seasonal variations in air temperature and physico-chemical parameters of water at Site 6	120
Seasonal variations in air temperature and physico-chemical parameters of water at Site 7	122
Seasonal variations in air temperature and physico-chemical	124
