

CONTENTS

	Page
I INTRODUCTION	1 - 5
II THE HOST	6 - 7
III THE DISEASE	8
IV THE PATHOGEN	
i) Synonymy, host range and distribution of the pathogen	9 -10
ii) Isolation and identification of the pathogen	11-12
iii) Description of the pathogen	13
iv) Cultural characteristics	14-16
v) Enzyme system of the pathogen	17-21
V NATURAL AND METHODS	22-23
VI PHYSICAL FACTORS	
i) pH	24-27
ii) Temperature	28-31
iii) Light	32-33
VII CHEMICAL FACTORS	
i) Carbon sources	36-41
ii) Nitrogen sources	42-47
iii) Vitamins	48-52
iv) Trace elements	53-59
v) Growth hormones	60-63

	Page
vi) Phosphorus and Sulphur	64-68
vii) Media	69-72
VIII BIOCHEMICAL CHANGES IN HOST TISSUE DURING PATHOGENESIS.	
i) Changes in total sugar and starch content	73-79
ii) Changes in chitin content	80-85
iii) Changes in saponin content	86-91
iv) Peroxidase activity	92-99
v) Polyphenol oxidase activity	100-106
IX CONTROL MEASURES	
i) Effect of fungicides on pathogen in culture	107-115
ii) Control of <u>Bignonea</u> tuber rot by fungicides	116-122
iii) Effect of antifungal volatile compounds on fungal growth in vitro.	123-127
iv) Control of <u>Bignonea</u> tuber rot by volatile compounds.	128-129
X DISCUSSION	130-139
XI SUMMARY	140-145
XII REFERENCES	146-180
