

# Table of Contents

	Chapter	Page #
Declaration		i
Abstract		ii
Acknowledgement		ix
Preface		xiv
List of figures		xviii
List of tables		xx
List of appendices		xxi
<b>1. Introduction</b>		<b>1-15</b>
<b>2. Review of Literature</b>		<b>17-43</b>
2.1 Natural processing for preservation		19
2.2 Probiotic, prebiotic and post-biotic		20-23
2.3 Gut microbe interaction and immune modulation		24
2.4 Cereals and their broad uses as fermented beverages		25-26
2.5 Fermented drinks of Asian tribal community		27-31
2.6 Biochemical properties of the fermented beverages		32
2.7 Medicinal properties of fermented beverages		33-36
2.8 Some of the fermented drink and their starter culture from India		37-43
<b>3. Materials and Methods</b>		<b>45-89</b>
3.1 Study area		43
3.2 Extended Survey and Collection of the Sample		44-52
3.3 Sample collection and primary characterisation		53
3.4 Qualitative screening of beverages		54
3.5 Nutritional profiling		55
3.6 In vitro antioxidant profiling		56-61
3.7. Screening of plants used in selected starter culture		62
3.8 Antimicrobial activity of the plants used in the starter culture		63-64
3.9 Assessment of <i>in vitro</i> cytotoxicity of sample extracts		65-66
3.10 In vitro anti-inflammatory assay		67-79
3.11 Chemical Characterizations of Selected Fermented Drink		70
3.12 <i>In silico</i> molecular docking		71-72
3.13 Network pharmacological study		73
3.14 Culture-dependent isolation of the Eukaryotic microflora		74-76
3.15 Culture-independent 16s metagenomic study		77-79
3.16 <i>In silico</i> Reverse ecology analysis		80
3.17 Whole metagenomic sequencing		81-82
3.18 <i>In vivo</i> acute toxicity analysis		83
3.19 <i>In vivo</i> sub acute toxicity analysis		84-85
3.20 Metagenomic study of gut microflora		86-87

<b>4. Results and Discussion</b>	<b>91-175</b>
4.1 Survey and Documentation	91-99
4.2 Collection of germplasm	99
4.3 Alcohol content and pH	100
4.4 Biochemical analysis	101
4.5 Nutritional profiling	102
4.6 Invitro antioxidant assay	103-109
4.7. Antimicrobial activity	113
4.8. Evaluation of cytotoxicity	114
4.9. In vitro anti-inflammatory assay	115-117
4.10 GC-MS	118
4.11 <i>In silico</i> molecular docking	123-128
4.12 <i>In silico</i> network pharmacology study	129-130
4.13 Culture-dependent isolation of Yeast	131-136
4.14 Culture-independent 16s rRNA metagenomics analysis	137-146
4.15 Reverse ecology analysis	147-148
4.16 Whole metagenomics sequencing (WMS) study	149-160
4.17 <i>In vivo</i> acute acute toxicity	161
4.18 <i>In vivo</i> acute acute toxicity	161-167
4.19 Metagenomic study of gut microflora	168-174
<b>Conclusion</b>	<b>177-181</b>
<b>Bibliography</b>	<b>183-198</b>
<b>Appendix (A-E)</b>	<b>I-VI</b>
<b>Index</b>	<b>01-02</b>
