

CONTENTS

	<u>Page No.</u>
Chapter I : Introduction	1-39
Chapter II : Studies on Coordination Compounds of Dioxouranium (VI) with N-(salicylidene) -anthranilic Acid (SAA-H ₂) and Acety- lacetone Anthranilic Acid (AAA-H ₂)	40-81
Chapter III : Studies on Dioxouranium (VI) Complexes of N-(Salicylidene)L-Alanine (SAla-H ₂), N-(Orthovanillidene)L-Alanine (OVala- HK), N-(Salicylidene)L-Valine (SVal-H ₂) and N-(Orthovanillidene)L-Valine (OVal-H ₂)	82-174
Chapter IV : Synthesis, characterization and conformation analysis of dioxouranium (VI) complexes of N-(salicylidene)L- tyrosine and N-(orthovanillidene)L- tyrosine	175-247
Chapter V : Studies on Dioxouranium (VI) Complexes of N-(Salicylidene)-L-Methionine (SMet-H ₂), N-(Salicylidene)-L-Cysteine (SCys-H ₃) and N-(Salicylidene)-L- Glutamic Acid (SGlu-H ₃)	248-306
Chapter VI : Synthetic and chiroptical Studies on lanthanide (III) complexes with imine acids derived from L-valine, L-alanine, L-tyrosine and L-glutamic acid	307-378
Annexure : 1. Dioxouranium (VI) Complexes of N-Salicylidene Valine.	
2. Coordination Chemistry of f-Block Elements with Imine Acids : Part I- Studies on Coordination Compounds	

of Dioxouranium (VI) with
N-(Salicylidene) anthranilic
Acid.

3. Coordination chemistry of **f**-Block
Elements with Imine Acids. Part II.
Studies on Dioxouranium (VI)
Complexes of N-(Salicylidene)-L-
Valine and N-(Orthovanillidene)-L-
Valine.
