

Contents

1. Introduction	1 – 6
2. Literature Review	7 – 41
3. Material and Methods	42 – 67
3.1. Griding of study area	42
3.1.1. Terai-Dooars region	42
3.2. Soil sampling strategy	44
3.3. Isolation of microorganisms from soil	44
3.3.1. Soil dilution technique	44
3.3.2. Direct soil plating	44
3.3.3. Soil washing technique	45
3.4. Composition of Solid media	47
3.5. Microscopic Observation	47
3.5.1. Bright field	47
3.5.2. SEM studies of selected organisms	48
3.6. Biochemical tests of microorganisms	48
3.6.1. Gram reaction	48
3.6.2. Endospore stain	48
3.6.3. Catalase	48
3.6.4. Urea digestion	48
3.6.5. Casein hydrolysis	48
3.6.6. Starch hydrolysis	49
3.6.7. Indole test	49
3.6.8. Siderophore production	49
3.6.9. Chitinase production	49
3.6.10. Cellulase Production	49
3.6.11. Protease production	49
3.6.12. H ₂ S production	49
3.7. Screening for phosphate solubilizing activity	49
3.8. Evaluation of phosphate solubilizing activity	50
3.9. Screening for cellulase production	50
3.9.1. Assay of endocellulase activity	51
3.9.2. Assay of both exo and endocellulase activity	51
3.10. Screening of BCA isolates	51
3.10.1. Antagonistic activity	51
3.10.2. Chitinase activity	52
3.11. Immunological studies	52
3.11.1. Preparation of fungal antigen	52
3.11.2. Preparation of soil antigen	52
3.11.3. Estimation of protein content	52
3.11.4. SDS-PAGE analysis of soluble proteins	53
3.11.4.1. Preparation of stock solution	53
3.11.4.2. Preparation of gel	53
3.11.4.3. Sample preparation	54
3.11.4.4. Electrophoresis	55
3.11.4.5. Fixing and staining	55
3.12. Raising of polyclonal antibodies	55
3.12.1. Rabbits and their maintenance	55
3.12.2. Immunization	55
3.12.3. Bleeding	56
3.13. Purification of IgG	56

3.13.1. Precipitation	56
3.13.2. Column preparation	56
3.13.3. Fraction collection	56
3.14. Immunodiffusion test	57
3.14.1. Preparation of agarose slides	57
3.14.2. Diffusion	57
3.14.3. Washing, staining and drying of slides	57
3.15. Dot immunobinding assay	57
3.16. Fluorescence antibody staining and microscopy	58
3.17. Mass multiplication of PSFs, BCAs and fungal pathogens	58
3.18. Inoculation technique and disease assessment	59
3.19. Assay of enzyme activities	60
3.19.1. β -1, 3-glucanase	60
3.19.2. Chitinase	60
3.19.3. Peroxidase	60
3.20. Isolation of genomic DNA	60
3.20.1. Preparation of genomic DNA extraction buffer	61
3.20.2. Genomic DNA extraction	61
3.20.3. Purification of genomic DNA	61
3.20.4. Measure DNA Concentration using Spectrophotometry	62
3.20.5. Agarose gel electrophoresis to check DNA quality	62
3.20.6. Preparation of DNA samples for electrophoresis	62
3.20.7. Run gel electrophoresis for DNA fraction	62
3.21. RAPD PCR analysis	62
3.21.1. PCR primers	63
3.21.2. Amplification conditions	63
3.21.3. Analysis of RAPD band patterns	63
3.21.4 Scoring of individual bands	63
3.21.5. Reconstruction of the phylogenetic tree	63
3.21.6. UPGMA method	64
3.22. ITS PCR analysis	64
3.22.1. PCR primers	64
3.22.2. Amplification conditions	65
3.22.3. Sequencing of rDNA gene	65
3.23. Sequence analysis	65
3.23.1. Chromatogram of sequence	65
3.23.2. Editing and alignment of sequence data	65
3.24. BLAST of Sequence	65
3.25. Submission of rDNA gene to NCBI genbank	65
3.26. Denaturing Gradient Gel Electrophoresis (DGGE)	65
3.26.1. Creating the gel sandwich (DCode System BioRad)	66
3.26.2. Preparing the gel	66
3.26.3. Running a gel	67
3.26.4. Staining of gels and photography	67
4. Experimental	68 - 196
4.1 Isolation and identification of microorganism from forest soil, riverine soil and crop fields	68
4.1.1 Fungal isolates	76
4.1.1.1 Growth studies in solid medium	76
4.1.1.2. Microscopic observation	76
4.1.2. Bacterial isolates	100

4.1.2.1 Biochemical tests	100
4.1.3. Actinomycetes isolates	100
4.1.3.1 Biochemical tests	100
4.2. <i>In vitro</i> screening of fungal isolates for phosphate solubilizing activities	110
4.2.1 Screening in solid medium	110
4.2.2. Evaluation in liquid medium	110
4.3. <i>In vivo</i> application of selected phosphate solubilizing fungi and their effect on plant growth	115
4.4. Evaluation of selected bacterial isolate on plant growth promotion <i>in vitro</i> and <i>in vivo</i>	118
4.5. Evaluation of selected actinomycetes on plant growth promotion <i>in vitro</i> and <i>in vivo</i> application and their effect on improvement of plant health	123
4.6 Screening of the fungal isolates showing antagonistic activities against selected phytopathogens	128
4.7 Determination of cellulase activity of selected fungal isolates showing antifungal activities	132
4.8. Determination of chitinase activities of <i>Trichoderma</i> isolates showing antifungal activities	135
4.9 Immunological characterization of <i>Trichoderma</i> isolates	142
4.9.1 Soluble protein	142
4.9.2. Serology	142
4.10. <i>In vivo</i> test of BCA isolates	147
4.11. Diversity analysis of PSF isolates	150
4.11.1 Isolation and purification of genomic DNA from PSF isolates	150
4.11.2. RAPD patterns	151
4.11.3. Phylogenetic analysis	152
4.12. Diversity analysis of bacterial isolates	154
4.12.1 Isolation and purification of genomic DNA from bacterial isolates	154
4.12.2 RAPD patterns	155
4.12.3. Phylogenetic analysis	156
4.13. Diversity analysis of actinomycetes isolates	158
4.13.1. Isolation and purification of genomic DNA from actinomycetes isolates	158
4.13.2 RAPD patterns	158
4.13.3. Phylogenetic analysis	160
4.14 Genomic DNA preparation and quantification of isolates of <i>Trichoderma harzianum</i> and <i>Trichoderma viride</i>	162
4.15. PCR-RAPD analysis of isolates of <i>Trichoderma harzianum</i> and <i>T. viride</i>	164
4.16. Internal Transcribed Spacer (ITS) amplification of <i>Trichoderma</i> isolates and their analyses	174
4.17 Denaturing gradient gel electrophoretic (DGGE) analyses of <i>Trichoderma harzianum</i>	185
4.18 Sequencing of rDNA region of <i>T. harzianum</i> and their submission in NCBI database	187
4.19 Analyses of rDNA gene sequences of <i>Trichoderma harzianum</i>	188
Discussion	197-209
Summary	210-214
References	215-243
