Certificate by Supervisor	
Acknowledgement	1-2
List of Publications	8
Enclosure: Re-Print / Galley Proof / Acceptance Letter	9-35
Seminar/Symposium/Convention Attended	36
Enclosure: Certificates/Abstract	37-40

CHAPTER A:

A.1: Object and application of the Research Work 41-58

A.1.1. Object and application of the Research Work	41-43
A.1.2. Importance and scope of physico-chemical parameters	43-44
A.1.3. Importance of solvents used	44-49
A.1.4. Method of Investigations	49-50
A.1.5. Summary of the works done	50-55
References	56-58

A.2: General Introduction 59-122

A.2.1 Investigation on Viscous Synergy and Antagonism	59-60
A.2.2. Ion-Ion interaction	61
A.2.3. Investigation on Ion-Solvent Interaction	61-63
A.2.4. Theory of Mixed Solvents	63-64
A.2.5. Volumetric Measurement	64
A.2.5.1. Apparent and Partial Molar Volumes	64-67
A.2.5.2. Ionic Limiting Partial Molar Volumes	67-68
A.2.5.3. Excess Molar Volumes	68
A.2.6. Viscometric Measurement	68-70
A.2.6.1. Viscosities at Higher concentration	70-72
A.2.6.2. Division of B -coefficient	72-76
A.2.6.3. Temperature dependence of B -ion values	76-80
A.2.6.4. Thermodynamics of Viscous Flow	80-81
A.2.6.5. Effect of Shape and Size	81-82
A.2.6.6. Viscosity Deviation	83
A.2.6.7. Gibbs Excess Energy of activation	83
A.2.7. Ultrasonic Speed	83
A.2.7.1. Apparent Molal Isentropic Compressibility	83-85
A.2.7.2. Deviation in Isentropic compressibility	85
A.2.7.3. Acoustic Parameters	85-86
A.2.7.4. Theoretical Models of Ultrasonic Speeds	86-87
A.2.8. Correlating Equation	87-90
A.2.9. Conductance	90-92

TOPIC**Page No.**

A.2.9.1	Ionic Association	92-95
A.2.9.2	Ion Size Parameter and Ionic Association	95-98
A.2.9.3	Limiting Equivalent Conductance	98-101
A.2.9.4	Solvation Number	101-102
A.2.9.5	Stoke's Law and Walden's Rule	102-106
A.2.10.	Solvation Models-Some Recent Trends	106-107
A.2.11.	Conductance Some Recent Trends	107-111
	References	112-122

A.3: Experimental Section**123-138**

A.3.1.	Source and Purification of the Chemicals used	123
A.3.1.1	Solvents	123-125
A.3.1.2	Mixed Solvents	125-127
A.3.1.3	Solutes	127-129
A.3.2.	Experimental Methods	129
A.3.2.1	Measurement of Density	129-131
A.3.2.2.	Measurement of Viscosity	132-133
A.3.2.3.	Measurement of Ultrasonic Speed	133-135
A.3.2.4.	Measurement of Conductance	135-136
	References	137-138

CHAPTER B:

B.1: Density and Viscosity of Acrylonitrile + Cinnamaldehyde + Anisaldehyde, and + Benzaldehyde at(298.15, 308.15, 318.15) K.	139-154
--	----------------

B.1.1.	Introduction	139
B.1.2.	Experimental Section	140-141
B.1.3.	Results and Discussion	141-144
	References	145-146
	Tables	147-151
	Figures	152-154

* Published in Journal of Chemical Engineering and Data 53 (2008) 1431-1435

TOPIC**Page No.**

B.2: Study on Solution Properties with Reference to Molecular Interactions Occuring in Some Industrially Important Solvents **155-196**

B.2.1. Introduction	155-156
B.2.2. Experimental Section	156-157
B.2.3. Results and Discussion	157-167
B.2.4. Conclusion	167
References	168-169
Tables	170-184
Figures	185-196

*** Communicated in International journal of Thermophysics**

B.3: Study on Solution-Solution Interactions Prevailing in Some Liquid Mixtures by physico-chemical Techniques. **197-232**

B.3.1. Introduction	197-198
B.3.2. Experimental Section	198-199
B.3.3. Results and Discussion	199-206
B.3.4. Conclusion	207
References	208-210
Tables	211-224
Figures	225-232

*** Communicated in Indian journal of science and Technology**

CHAPTER-C**C.1: Conductometric Study of Some Alkali Metal Halides in Dimethyl Sulfoxide + Acetonitrile mixtures at 298.15 K** **233-250**

C.1.1. Introduction	233-234
C.1.2. Experimental Section	234-235
C.1.3. Results and Discussion	235-239
C.1.4. Conclusion	239-240
References	241-242
Tables	243-248
Figures	249-250

*** Published in Journal of Chemical Thermodynamics 41 (2009)1187-1192**

C.2: Ion- Pair and Triple- Ion Formation by Some Tetraalkylammonium Iodides in Binary Mixtures of 1,4-Dioxane + Tetrahydrofuran **251-264**

C.2.1.	Introduction	251
C.2.2.	Experimental Section	251-252
C.2.3.	Results and Discussion	253-255
	References	256-257
	Tables	258-261
	Figures	262-264

***Published in Journal of Chemical and Engineering Data 53 (2008) 1417-1420**

CHAPTER-D

D.1: Apparent molar volume, Viscosity *B*-coefficient and Adiabatic Compressibility of Tetrabutylammonium bromide in aqueous Ascorbic acid Solutions at T = (298.15, 308.15 and 318.15) K **265-290**

D.1.1.	Introduction	265-266
D.1.2.	Experimental Section	266-267
D.1.3.	Results and Discussion	267-274
D.1.4.	Conclusion	274
	References	275-276
	Tables	277-287
	Figures	288-290

***Accepted for Publication in the Russian Journal of Physical Chemistry A**

D.2: Studies on Molecular Interactions of Oxalic acid and its salts in Coaqueous Solutions of 1,3-Dioxolane + Water by Volumetric, Viscometric Measurements at T= (298.15,308.15, and 318.15)K **291-318**

D.2.1.	Introduction	291-292
D.2.2.	Experimental Section	292-293
D.2.3.	Results and Discussion	293-298
D.2.4.	Conclusion	298
	References	299-300
	Tables	301-315
	Figures	316-318

*** Revised Paper under Consideration in Journal of Molecular Liquids**

TOPIC

Page No.

D.3: Studies on Solution Properties of Some Amino Acids in Aqueous Mixture of Catechol.

319-348

D.3.1. Introduction	319-320
D.3.2. Experimental Section	320-321
D.3.3. Results and Discussion	321-330
D.3.4. Conclusion	330-331
References	332-333
Tables	334-346
Figures	347-348

**Taylor & Francis**
Taylor & Francis Group

***Accepted for Publication in the Journal of Dispersion Science and Technology (In Press)**

CHAPTER E: Concluding Remarks

349-354

Corrigendum - - - - - 355-362
