

## Table of contents

Number	Name	Page number
	Acknowledgement	i-iii
	Preface	v-vi
	List of figures	xiii-xviii
	List of tables	xix-xxi
	List of abbreviation	xxiii-xxvi
<b>Chapter 1: Introduction</b>		
1.1.	<b>Melatonin</b>	1
1.1.1.	<b>Discovery</b>	1
1.1.2.	<b>Biosynthesis</b>	2
1.2.	<b>Chrono biological features of circulatory melatonin</b>	2-3
1.2.1.	<b>Diurnal pattern</b>	3
1.2.2.	<b>Seasonal pattern</b>	4-5
1.3.	<b>Ovarian development in fish and the role of melatonin</b>	5-6
1.3.1.	<b>Melatonin and ovarian growth</b>	6-9
1.3.2.	<b>Melatonin and ovarian maturation</b>	9-10
1.4.	<b>Melatonin in the regulation of fecundity and development of fish embryo</b>	10-11
<b>Chapter 2: Review of literature</b>		13
2.1.	<b>Indian major carp, <i>Catla catla</i> – a model organism in the perspective of melatonin research</b>	15-16
2.2.	<b>Life cycle, growth, and reproductive stages of carp, <i>Catla catla</i></b>	16-19
2.2.1.	<b>Ovarian onset and development</b>	19
2.2.2.	<b>Annual ovarian cycle in connection to reproductive season</b>	19-22
2.3.	<b>Endogenous sources of melatonin in fish</b>	22-23
2.3.1.	<b>Light-dark regulated melatonin sources</b>	23
2.3.1.1..	<b>Pineal melatonin</b>	23-25
2.3.1.2.	<b>Retinal melatonin</b>	25-26
2.3.1.3.	<b>Hepatic melatonin</b>	26-27
2.3.1.4.	<b>Ovarian melatonin</b>	27
2.3.2.	<b>Feeding-fasting regulated melatonin sources</b>	27-28
2.3.2.1.	<b>Gut melatonin</b>	28
2.3.2.1.1.	<b>Localization and profiling of melatonin in gut/GIT</b>	28-30

## Table of contents

2.3.2.1.2.	Daily and seasonal profiles	30-31
2.3.2.1.3.	Availability and timing of food supply	31-33
2.3.2.1.4.	Quality of fish feed	34-35
2.3.2.2.	Potential Functions of gut melatonin	35-37
2.4.	Role of quality feed for the optimum growth and health of fish	38-40
2.5.	Lacunae in existing knowledge	40-43
2.6.	Purpose and objectives of the current study	44-45
2.7	Significance of the study	45
<b>Chapter 3: Materials and Methods</b>		<b>47</b>
3.1.	<b>Materials</b>	<b>49</b>
3.1.1.	Experimental animals	49
3.1.2.	Experimental dietary ingredients	49
3.1.3.	Chemicals and reagents	49-50
3.2.	<b>Methods</b>	<b>50</b>
3.2.1.	<b>Diet preparation</b>	<b>50</b>
3.2.1.1.	Balanced diet or Standard diet (SD)	50
3.2.1.2.	Protein-rich diets (PRD1 and PRD2)	50-51
3.2.1.3.	Tryptophan-rich diets (TrpRD1 and TrpRD2)	51
3.2.1.4.	Carbohydrate-rich diet (CRD)	51
3.2.1.5.	Oil-rich diet (ORD)	51-52
3.2.2.	Proximate analysis of diet	52-53
3.2.3.	Collection, care, grouping, and feeding of fish	53-56
3.2.4.	Evaluation of specific growth rate (SGR)	56
3.2.5.	Collection and preparation of samples	56
3.2.5.1.	Serum collection	56
3.2.5.2.	Tissue collection for histological study	57
3.2.5.3.	Estimation of residual gut content (RGC)	57
3.2.5.4.	Estimation of feeding intensity (FI)	57
3.2.5.5.	Estimation of gastro-somatic index (GaSI)	57
3.2.5.6.	Estimation of gonado-somatic index (GSI)	57
3.2.5.7.	Tissue collection and preparation of sample	57-58
3.2.6.	Estimation of melatonin concentrations in gut, serum, and ovary	58-59
3.2.7.	Estimation of the activities of vital digestive enzymes	59
3.2.7.1.	$\alpha$ -amylase activity	59-60

## Table of contents

3.2.7.2.	Protease activity	60
3.2.7.3.	Lipase activity	60
3.2.7.4.	Cellulase activity	60
3.2.8.	Measurement of gut histological parameters and microscopic evaluation of the gametogenic status of the ovary for the ovarian growth assessment	61
3.2.9.	Estimation of the levels of stress marker (Malondialdehyde/MDA)	62-63
3.2.10.	Estimation of the levels of antioxidative agents	63
3.2.10.1.	Superoxide dismutase (SOD)	63
3.2.10.2.	Catalase (CAT)	63-64
3.2.10.3.	Glutathione peroxidase (GPx)	64
3.2.10.4.	Glutathione reductase (GRd)	64
3.2.10.5.	Glutathione S-transferase (GST)	64-65
3.2.10.6.	Reduced glutathione (GSH)	65
3.2.11.	Statistical analysis	65-66
<b>Chapter 4: Results</b>		<b>67</b>
4.1.	Effects of the standard (control) diet (SD) on early juvenile (EJv) and late juvenile (LJv) carp	69
4.1.1.	Growth and gut parameters	69
4.1.2.	Gut melatonin	69
4.1.3.	Vital digestive enzymes	69
4.1.4.	Stress marker (Malondialdehyde/MDA) and antioxidative agents	69
4.2.	Effects of experimental diets on EJv and LJv carp	70
4.2.1.	Growth and gut parameters	70
4.2.1.1.	Specific growth rate (SGR)	70
4.2.1.2.	Gastro-somatic index (GaSI)	71
4.2.1.3.	Residual gut content (RGC)	71
4.2.1.4.	Feeding intensity (FI)	71
4.2.2.	Gut melatonin	71-72
4.2.3.	Correlation and principal component analysis (PCA) among the parameters of growth, feeding and gut melatonin	72-74
4.2.4.	Estimation of the activities of vital digestive enzymes	74
4.2.4.1.	$\alpha$ -amylase activity	74
4.2.4.2.	Protease activity	75

## Table of contents

4.2.4.3.	Lipase activity	75
4.2.4.4.	Cellulase activity	75-76
4.2.5.	Correlation and principal component analysis (PCA) among the gut melatonin and digestive enzymes	77-78
4.2.6.	Gut histological parameters	78-79
4.2.7.	Stress marker and antioxidative agents in the gut	80
4.2.7.1.	Malondialdehyde/MDA (a faithful intra-cellular stress marker)	80
4.2.7.2.	Superoxide dismutase (SOD)	80-81
4.2.7.3.	Catalase (CAT)	82
4.2.7.4.	Glutathione peroxidase (GPx)	82
4.2.7.5.	Glutathione reductase (GRd)	82
4.2.7.6.	Glutathione S-transferase (GST)	82-83
4.2.7.7	Reduced glutathione (GSH)	83
4.2.8.	Correlation and principal component analysis (PCA) among melatonin, intra-cellular stress marker, and antioxidative agents in the gut	83-85
4.2.9.	Melatonin concentrations in serum of LJv carp	85-86
4.2.10.	Ovarian parameters in LJv carp	86
4.2.10.1.	Melatonin concentrations in the ovary	86
4.2.10.2.	Gonado-somatic index (GSI)	86
4.2.10.3.	Microscopic evaluation of the gametogenic status of the ovary	86-87
4.2.10.4.	Correlation and principal component analysis (PCA) among the melatonin profiles in the gut, serum, and ovary, gonado-somatic index (GSI), and relative percentage of different stages of the oocyte	88
4.2.10.5.	Stress marker and antioxidative agents in the ovary	89
❖	Malondialdehyde/MDA (a faithful intra-cellular stress marker)	89
❖	Estimation of the levels of ovarian antioxidative agents	89
➤	Super oxide dismutase (SOD)	89
➤	Catalase (CAT)	90
➤	Glutathione peroxidase (GPx)	90
➤	Glutathione reductase (GRd)	90
➤	Glutathione S-transferase (GST)	90
➤	Reduced Glutathione (GSH)	90-91

## Table of contents

4.2.10.6.	Correlation and principal component analysis (PCA) among the melatonin profiles in the gut, serum, and ovary, intracellular stress marker, and the activity of antioxidative agents in the ovary	92
<b>Chapter 5: Discussion</b>		<b>93</b>
5.1.	Response of laboratory-prepared standard/balanced diet on gut melatonin and its effect on the studied growth and gut parameters in EJv and LJv carp	96-97
5.2.	Response of laboratory-prepared different quality diets on gut melatonin and its effect on the studied growth and gut parameters in EJv and LJv carp	98
5.2.1	Gut melatonin	98-99
5.2.2.	Somatic growth	99-101
5.2.3.	Gut growth	102
5.2.4.	Gut histo-architecture	102-103
5.2.5.	Feeding parameters	103-105
5.2.6.	Digestibility	105-108
5.2.7.	Gut stress management	108-112
5.3.	Effects of laboratory-prepared different quality diets on serum and ovarian melatonin in late juvenile carp in the context of feeding-associated gut melatonin	112-113
5.4.	Effects of feeding associated altered melatonin on ovarian parameters in late juvenile carp	113-114
5.4.1.	Ovarian development and gametogenic status	114-117
5.4.2.	Ovarian stress management	117-118
<b>Chapter 6: Summary and Conclusion</b>		<b>119</b>
6.1.	Summary and conclusion	121
6.1.1.	Summary	121-126
6.1.2.	Conclusion	126
6.2.	Future perspective	127
	Bibliography	128-162
	Appendix	163
	Publications	163
	Paper presented at conferences	163
