

A C K N O W L E D G E M E N T

This thesis is the result of the research work done by the author at the Radiation Physics Laboratory of the Department of Physics, North Bengal University. The research work was carried out, and the thesis prepared, under the leadership and guidance of Professor N. Choudhuri. I am deeply indebted to him for his inspiration, supervision and active participation throughout the period of the work.

I remember with gratitude the help and encouragement given to me by Dr. S.K. Sengupta, Head, University Science and Instrumentation Centre, North Bengal University. I thank him for his unflagging interest in my work.

I express my sincere thanks to Sri Passang Tamang, Electronic Technician at the Department of Physics, for his tenacious co-operation in carrying out the experiments.

I am thankful to the University Grants Commission, New Delhi, India, for providing me with a Teacher Fellowship and to the Governing Body of the Ananda Chandra College, Jalpaiguri for granting me a leave of three years enabling me to undertake the work.

A patient and excellent job of typing out the thesis by Sri M. Chakraborty is gratefully acknowledged.
