INTRODUCTION.....	x - xiii
CHAPTER I	
Literature review.....	1 - 49
CHAPTER II	
Section 1: Extraction and characterization of pentacyclitriterpenoids (Lupeol) from <i>Xanthoxylum budrunga</i>.....	50- 59
1.1: Extraction from the bark of <i>Xanthoxylum budrunga</i> - isolation of lupeol (compound A).....	51 - 52
1.2: Chemical characterization of fractions.	52
1.3: Preparation of Bromo derivatives of Lupeol.....	52
1.3.1: Hydrogenation of lupeol: preparation of lupanol.	52 - 53
1.3.2: Jones' oxidation of lupanol: preparation of lupanone.	53
1.3.3: Characterization of fractions.	53 - 54
1.3.4: Preparation of compound B and C-Treatment of lupanone with N-bromosuccinimide: formation of 2,2-dibromolupanone (compound B) and 2 α -bromolupanone.....	54
1.3.5: Examination of fractions 2-7: isolation of 2,2-dibromolupanone (compound B) And characterization.	55
1.3.6: Examination of fractions 8-14: isolation of 2 α -bromolupanone(compound C) and characterization.....	56
1.3.7 Dehydrobromination of 2 α -bromolupanone with lithium bromide-N,N-dimethyl-formamide: isolation of lup-1(2)-en-3-One (compound D).	57 - 58
1.3.8. Preparation of lupan[2,3-C]-1,2,5-oxadiazole(compound E). From lupane 2,3 dioxime.....	58 - 59
Section 2: Antimicrobial activity.	
2.1: Materials and Methods.	59 - 63
2.1.1: General introduction.....	59 - 60
2.1.2 Maintenance of stock cultures.	60 - 61
2.1.3: Spore germination bio-assay.	61 - 62
2.1.4: Bioassay by disc diffusion method.....	62
2.1.5: Determination of MIC by Agar Cup method.	63
2.2: Results.....	64 - 79
2.3: Discussion.....	80 - 84
Section 3: Reference.....	85 - 88

CHAPTER III

Section 1: Extraction and characterization of pentacyclic triterpenoids (Betulinic acid) from <i>Bischofia javanica</i>	89 - 97
1.1: Extraction of <i>Bischofia javanica</i> - isolation of Betulinic acid.....	90
1.2: Esterification of Betulinic acid: isolation of Methylbetulinate.....	90 - 91
1.3: Examination and characterization of fractions.	91
1.4: Preparation of Bromo derivatives of Betulinic Acid.....	92
1.4.1: Hydrogenation of methylbetulinate: preparation of methyl dihydro betulinate..	92
1.4.2: Jone's oxidation of lupanol: preparation of methyl dihydrobetulinate.....	92 - 93
1.4.3: Preparation of compound F and G—Treatment of methyl dihydrobetulinate with N-bromosuccinimide: formation of 2,2-dibromomethyl dihydrobetulinate (compound F) and 2 α -bromo methyl dihydrobetulinate (compound G).....	93 - 94
1.4.4: Examination of fractions 4.-9: isolation of 2,2-dibromo methyl dihydrobetulinate (compound F)	94
1.4.5: Examination of fractions 11-18: isolation of 2 α -bromo methyl dihydrobetulinate (compound G)	95
1.4.6: Dehydrobromination of 2 α -bromomethyl dihydrobetulinate: isolation of 28-carbomethoxy lupan-1-(2)-en-3-one.(compound H).	95 - 96
1.4.7: Cyclisation of the dioxime to 28-carbomethoxy lupan[2,3-C]-1,2,5-oxadiazole (compound I).	97
Section 2: Antimicrobial activity.	
2.1: Material and Methods.	98
2.2: Results.....	98 - 108
2.3: Discussion.....	109- 111
Section 3: Reference	112- 115

CHAPTER IV

Section 1: Extraction and characterization of pentacyclic triterpenoids (Cerin and Friedelin) from <i>Quercus suber</i>	116
1.1: Isolation of Cerin from bark cork.....	117
1.2: Isolation of Friedelin from bark cork.....	117
1.3: General experimental details.	118
1.4: Plant materials.	118
1.5: Preparation of plant extract.	118
Section 2: Antimicrobial activity.	
2.1: Material and Methods.	119
2.2: Results.....	119- 125
2.3: Discussion.....	126- 128
Section 3: Reference	129
Conclusion.....	130
Summary.....	131- 135
