

## ACKNOWLEDGEMENT

It is my privilege to express my heartfelt gratitude and indebtedness to Professor Bijan Das, Department of Chemistry, University of North Bengal, Darjeeling 734 013 for his unwavering supervision and continuous encouragement. The brain storming discussions over the years have made my interest grow on polyelectrolyte chemistry. Moreover his charming personality and loving attitude have helped me immensely in this journey.

I would also like to convey my earnest gratitude to all my teachers who have been a source of inspiration for a long time. The affection they showed and facilities they have provided over the years have surely helped me complete this work.

I thank all the research scholars in our lab for their help, cooperation and friendly approach. The positive support of all the research scholars in the department is also highly acknowledged.

I shall be falling in my duty if I do not pay my heartiest thanks and gratefulness to the University authorities for providing the lab facilities and the University Scientific and Instrumentation Centre for technical assistance.

I am grateful to my parents, Sri Arun Chatterjee and Smt. Gita Chatterjee, for all their blessings and inspiration. I am also grateful to the relatives for their good wishes. I am deeply beholden to my wife Tanushree and son Archisman for their love, support and for providing enjoyable working atmosphere.

Finally, I bow to God.

Dated: 25/7/12

Department of Chemistry  
University of North Bengal
