

# CONTENTS

## PART – I

### (PREPARATION AND PHOTOCHEMISTRY OF CROSS- CONJUGATED CYCLOHEXADIENONE RING A OF FRIEDALANE TRITERPENE)

<b>CHAPTER – I</b>	<b>Page</b>
<b>(A Short Review on Structural Aspects of Cross-Conjugated Cyclohexadienone Photochemistry)</b>	
Introduction .....	1
<b>SECTION – A</b> (A Short Review on Santonin → Lumisantoinin Photorearrangement) .....	3
<b>SECTION – B</b> (A Short Review on Photochemistry of Monocyclic 2,5-Cyclohexadienones) .....	12
<b>SECTION – C</b> (A Short Review on Bicyclic Cross-Conjugated Cyclohexadienones) .....	22
<b>SECTION – D</b> (A Short Review on Photochemistry of Polycyclic Cross-Conjugated cyclohexadienones Including Steroids) .....	27
<b>SECTION – E</b> (Formation of Phenolic Photoproducts) .....	40
<b>SECTION – F</b> (Hetero 2,5-cyclohexadienones Photorearrangement) .....	58
<b>SECTION – G</b> (Anomalous Photorearrangement of 2,5-cyclohexadienones) .....	61

<b>CHAPTER – II</b>	<b>Page</b>
<b>(A Short Review on Mechanistic Aspect of Cyclohexadienone Photochemistry)</b>	
Introduction .....	66
<b>SECTION – A</b> (Involvement of Free Radical Intermediates) .....	69
<b>SECTION – B</b> (Involvement of Zwitterion Intermediates) .....	76
<b>SECTION – C</b> (Multiplicity and Energy of the Reactive Excited State) .....	85
<b>SECTION – D</b> (Electronic Configuration of Reactive Excited State [ $n, \pi^*$ vs. $\pi, \pi^*$ ]) .....	87
<b>CHAPTER – III</b>	
<b>(Preparation and Photochemistry of Cross-Conjugated cyclohexadienone Ring A of Friedalane Triterpene)</b>	
Introduction .....	91
<b>SECTION – A</b> (Preparation of the Key Compound (358) : Scheme – IV).....	93
<b>SECTION – B</b> (Formation and Characterisation of the Lumiprodukt (360) : Scheme – V) .....	98
<b>SECTION – C</b> (Isolation and Characterisation of the Phenolic Product (361) : Scheme – VI) .....	107
<b>CHAPTER – IV</b>	
<b>(Experimental-Section)</b> .....	109
<b>References</b> .....	117

## PART – II

### (PREPARATION AND MOLECULAR REARRANGEMENTS OF 2 $\alpha$ , 3 $\alpha$ -EPOXY LUPAN-1-ONE CATALYSED BY BORON TRIFLUORIDE AND BY ULTRAVIOLET IRRADIATION)

CHAPTER – I	Page
(A Short Review on the Molecular Rearrangement of $\alpha, \beta$ -Epoxy Ketones induced by (1) the Lewis Acid, Boron Trifluoride and (2) by Ultraviolet Irradiation)	
Introduction	129
SECTION – A (Induced by BF <sub>3</sub> -Etherate)	130
SECTION – B (Induced by UV Irradiation)	137
<b>CHAPTER – II</b>	
(Preparation and Molecular Rearrangement of 2 $\alpha$ , 3 $\alpha$ -Epoxy Lupan-1-one Catalysed by Boron Trifluoride and by Ultraviolet Irradiation)	
Introduction	154
SECTION – A (Synthesis of the Key Compound 2 $\alpha, 3\alpha$ -Epoxy Lupan-1-one (109) from Lupeol (105) : Scheme – 1)	157
SECTION – B (Molecular Rearrangement of the Key Compound Epoxy Ketone (109) Induced by Boron Trifluoride-Etherate : Chart-2 and Scheme-1)	160.
SECTION - C (Molecular Rearrangement of the Key Comopound, Epoxy Ketone (109) Induced by Ultra- violet Irradiation : Chart-2 and Scheme – 1)	162.
