1	GENERAL INTRODUCTION	1-24
1.1	Geological description of the sampling site: the original habitat of the <i>Acidithiobacillus ferrooxidans</i> strains used in the present study	1
1.2	Microbial ecology of mineral rich acidic environments	1
1.3	Physiology of <i>Acidithiobacillus ferrooxidans</i>	3
1.4	Metabolism of Iron, Elemental Sulfur and Reduced sulfur compounds	4
1.5	ATP production and uphill electron transport in <i>A. ferrooxidans</i>	7
1.6	Bioleaching activity	9
1.7	Genetics of <i>Acidithiobacillus ferrooxidans</i>	10
1.8	Implication of genomic abundance of Insertion Sequences	14
1.9	Objective of the study	15
1.10	References	16
2	CHAPTER-1	25-54
	Enrichment, Isolation and Characterization of <i>Acidithiobacillus ferrooxidans</i> strains from AMD of Garubathan	
2.1	Introduction	25
2.2	Materials and Methods	27
2.2.1	Sampling site	27
2.2.2	Media	28
2.2.3	Enrichment of acidophilic chemolithotrophic bacteria from Garubathan AMD	30
2.2.4	Isolation and purification of <i>Acidithiobacillus ferrooxidans</i> strains	30
2.2.5	Quantitative Estimations	31
2.2.6	Characterization of <i>Acidithiobacillus ferrooxidans</i> strains of Garubathan	36
2.3	Results	38
2.3.1	Isolation and selection of <i>Acidithiobacillus ferrooxidans</i> strains	38
2.3.2	Characteristics of <i>Acidithiobacillus ferrooxidans</i> strains	42
2.4	Discussion	48
2.5	Conclusion	50
2.6	References	51
3	CHAPTER-2	55-75
	Isolation and characterization of acidophilic heterotrophs from the culture of <i>Acidithiobacillus ferrooxidans</i> strains of Garubathan origin	
3.1	Introduction	55
3.2	Materials and Methods	57
3.2.1	Media	57
3.2.2	Enrichment and Isolation of acidophilic heterotrophs	58
3.2.3	Characterization of acidophilic heterotrophs from the AMD of Garubathan	59

3.3	Results	64
3.3.1	Isolation of acidophilic heterotrophs from the enriched <i>A. ferrooxidans</i> culture and from <i>A. ferrooxidans</i> colonies	64
3.3.2	Characterization of acidophilic heterotrophs	64
3.4	Discussion	70
3.5	Conclusion	72
3.6	References	73
4	CHAPTER-3	76-95
	Role of <i>Acidithiobacillus ferrooxidans</i> in alleviating the inhibitory effect of thiosulfate on the growth of acidophilic <i>Acidiphilium</i> species isolated from Garubathan AMD samples	
4.1	Introduction	76
4.2	Materials and Methods	77
4.2.1	Bacterial strains	77
4.2.2	Characterization of DK6.1 and DKAP1.1	77
4.3	Results	80
4.3.1	Phenotypic and 16S rRNA gene characterization of the test strains	80
4.3.2	Growth of <i>A. cryptum</i> DKAP1.1 in Elemental sulfur spent medium of <i>A. ferrooxidans</i> DK6.1 pure culture	80
4.3.3	Effect of submerged layering of <i>A. cryptum</i> DKAP1.1 cells on the manifestation of <i>A. ferrooxidans</i> DK6.1 colonies on Iron-agar	83
4.3.4	Inhibitory effect of thiosulfate on growth of <i>A. cryptum</i> DKAP1.1 and alleviation of inhibition in co-culture with <i>A. ferrooxidans</i> DK6.1	86
4.4	Discussion	87
4.5	Conclusion	92
4.6	References	93
5	CHAPTER-4	96-119
	Isolation and characterization of colony morphology variants of <i>Acidithiobacillus ferrooxidans</i> strains from AMD of Garubathan	
5.1	Introduction	96
5.2	Materials and Methods	98
5.2.1	Organisms	98
5.2.2	Media	98
5.2.3	Harvesting of cells	99
5.2.4	Isolation of colony morphology variants of <i>A. ferrooxidans</i>	100
5.2.5	Microscopic observations	100
5.2.6	Protein Estimation	101
5.2.7	Physiological characterization	101
5.3	Results	102
5.3.1	Isolation of colony morphology variants of <i>A. ferrooxidans</i>	102
5.3.2	Reversion of the colony morphology variants to the wild type	104

5.3.3	Growth of spreading variants on thiosulfate agar medium	104
5.3.4	Microscopic observation of spreading variant growing in slide chamber	105
5.3.5	Determination of generation time of spreading variants in elemental sulfur medium	106
5.3.6	Comparative study of physiology of wild and morphological variants of <i>A. ferrooxidans</i>	107
5.4	Discussion	111
5.5	Conclusion	116
5.6	References	117
6	CHAPTER 5	120-189
	Insertion sequence mediated genomic rearrangement in colony morphology variants of <i>Acidithiobacillus ferrooxidans</i>	
6.1	Introduction	120
6.1.1	Structure of Insertion Sequence	120
6.1.2	Influence of IS element in the expression of neighboring genes	121
6.1.3	Role of IS element in evolution of bacteria	123
6.1.4	Insertion Sequences in <i>A ferrooxidans</i> genome	125
6.2	Materials and Methods	128
6.2.1	Chromosomal DNA preparation	128
6.2.2	Plasmid DNA preparation	128
6.2.3	Restriction digestion	132
6.2.4	Purification of DNA	132
6.2.5	Amplification of DNA using PCR (Polymerase Chain Reaction)	133
6.2.6	Cloning of PCR products	137
6.2.7	Transformation of recombinant plasmids	139
6.2.8	DNA sequencing	141
6.2.9	Computer analysis of the sequence	141
6.2.10	Southern Hybridization	142
6.3	Results	144
6.3.1	16S rRNA gene amplification	144
6.3.2	Determination of presence of <i>IST445</i> and <i>IST2</i> sequences in Garubathan strains	145
6.3.3	Amplification of inter-IS sequence using outwardly directed primers of <i>IST445</i> and <i>IST2</i> :	161
6.3.4	Analysis of pAR1 sequence	167
6.4	Discussion	178
6.5	Conclusion	182
6.6	References	184
7	GENERAL DISCUSSION	190-196
8	SUMMARY	197-200
9	LIST OF PUBLICATIONS	201
