

## A C K N O W L E D G E M E N T

The present thesis embodies the results of research carried out by the author at the Department of Chemistry, University of North Bengal, Dist. Darjeeling, West Bengal.

At the very first opportunity the author offers his heartfelt gratitude and grateful thanks to Dr. B.P. Pradhan, Reader in Chemistry, University of North Bengal, to whom he is even grateful for his unstinted help, sincerest guidance, constructive interpretations, valuable suggestions and keen interest throughout the research programme.

The author is thankful to the University Grants Commission, New Delhi for awarding Junior Research Fellowship as well as to the authorities of the North Bengal University for providing Laboratory and Library facilities. The author is indebted to Prof. P. Weyerstahl, Institut fur Organische Chemie, Technische Universitat, Berlin for most of the mass,  $^1\text{H}$  NMR and  $^{13}\text{C}$  NMR spectra recorded in this thesis; to Dr. A. Patra, Department of Chemistry, University College of Science, Calcutta for some of the spectral data; to the Director C.D.R.I, Lucknow for optical rotations and microanalysis recorded in the thesis. The author is also grateful to the authority of Sukhna Forest, Darjeeling for supplying the plant materials. The author acknowledges his indebtedness to all the teachers in the Department of Chemistry for their constant

inspiration. Sincere thanks are also accorded to Dr. S.N.Bose, Head, Department of Chemistry and Dr. T.K.Roy, Senior Research Assistant at the Department for helpful suggestions. The author also expresses his thanks to fellow research workers for their kind help and co-operation and Mr. M. Chakraborty for typing the manuscript.

Finally, the author pays deep regards to his beloved parents, his brothers, sisters, sisters-in-law and brothers-in-law for their constant inspiration, co-operation and encouragement.

The shortcomings, if any, are entirely the author's.
