

C O N T E N T S

	<u>Pages</u>
Foreward	1-6
Programme of work	7
Introduction to mixed ligand complexes ..	8-15
Apparatus and Reagents	16

Part I, Solvent-Extraction of Cu(II), Co(II),
Pd(II) and Ni(II)

Section 1 - Extraction-photometric determination of Copper.

Introduction	17-22
Experimental and Results and Discussion ..	23-34

Section 2 - Extraction-photometric determination of Cobalt.

Introduction	35-40
Experimental and Results and Discussion ..	41-52

Section 3 - Extraction-photometric determination of Palladium.

Introduction	53-61
Experimental and Results and Discussion ..	62-75

Section 4 - Extraction-gravimetric determination of Nickel.

Introduction	76-80
Experimental and Results and Discussion ..	81-87
Introduction to gravimetry	88-94

Part II, Gravimetric determination of Ni(II), Pd(II), Cu(II) and Co(II) by acenaphthenequinonedioxime.

<u>Section 1 - Synthesis of Acenaphthenequinonedioxime</u>	95-99
<u>Section 2 - Gravimetric determination of nickel by Acenaphthenequinonedioxime.</u>	
Introduction	100-104
Experimental Results and Discussion ..	105-116
<u>Section 3 - Gravimetric determination of nickel as mixed dioxime complex.</u>	
Experimental and Results and Discussion ..	117-127
<u>Section 4 - Gravimetric determination of Palladium by acenaphthenequinonedioxime.</u>	
Introduction	128-132
Experimental and Results and Discussion ..	133-143
<u>Section 5 - Gravimetric determination of palladium as mixed dioxime complex.</u>	
Experimental and Results and Discussion ..	144-154
<u>Section 6 - Gravimetric determination of copper by acenaphthenequinonedioxime.</u>	
Introduction	155-161
Experimental and Results and Discussion ..	162-172

Section 7 - Gravimetric determination of cobalt by
acenaphthenequinonedioxime.

Introduction	173-178
Experimental and Results and Discussion	179-189

Part III.

Elemental analysis	190
Magnetism	191-193
Infrared and far infrared spectra	194-202
Electronic spectra	203-211
Thermal studies	211-214
References	215-220
