INTRODUCTION	1
MATERIALS AND METHODS	18
Animals	18
Raising of antithymocyte serum	18
Collection of guinea pig complement	19
In vitro culture of lymphocytes	19
In vitro mitogen mediated activation of lymphocytes	20
Dose regime of mitogens	20
Viability test	21
Measure of blastogenesis	21
Measure of DNA synthesis	21
PFC Assay	22
Cytotoxicity assay	23
Depletion of T cells by the treatment of anti-thymocyte serum	24
Isolation of M ϕ , T and B cells	25
Con A mediated activation kinetics of T cells in presence of different quantum of M ϕ and B cells	27
Study of serum suppressive factors	27a
Study of suppressor cell system	27a
Assay of Con A receptor density	27a

Enzyme extraction	29
Assay of LDH	30
Assay of G6PDH	31
Assay of m-Cs	32
Statistical calculations	33
RESULTS	34
Activation kinetics of Con A or PHA stimulated bat lymphocytes cultured in vitro in medium supplemented with autologous serum	34
Activation kinetics of LPS stimulated bat lymphocytes cultured in vitro in medium supplemented with autologus serum	35
Mitogen induced DNA synthesis in lymphocytes pretreated with anti- thymocyte serum	36
Assessment for functional differentia- tion of activated lymphocytes	36
Effect of different ratio of B & MØ on T cell activation	39
Activation kinetics of mitogen stimulated bat lymphocytes cultured in vitro in medium supple- mented with goat serum	39

Mitogen mediated activation of T cells after depletion of suppressor T cells	41
Mitogen mediated activation of B cells after removal of suppressor T cells	42
Stim ^w ulation of Con A receptor density on the T cell surface of bat lympho- cytes	43
Enzyme activity and substrate xxx affinity during T cell activation	44
DISCUSSION	47
SUMMARY	59
APPENDIX	
Figures	63
Tables	89
BIBLIOGRAPHY	103
