Abstract	iv
Table of Contents	vi
List of Figures	viii
List of Tables	xii
Preface	xiv
Acknowledgments	xv
Dedication	xvi
1 Introduction	1
1.1 Compact stars: Historical Background and Recent Developments . . .	1
1.2 Maximum Mass of Cold Compact Objects	8
1.3 Anisotropic Stars	10
1.4 Compact stars: Composition	12
1.5 Strange Star	14
1.6 Objectives of the present work	16
1.7 Mathematical Techniques	17
1.7.1 TOV Equations	18
1.7.2 Vaidya-Tikekar Model: An alternative approach	20
2 Maximum Mass of a Class of Compact Stars	24
2.1 Introduction	24
2.2 Vaidya-Tikekar model for a compact star	27
2.3 Relativistic bound on mass	29
2.4 Maximum mass for a given radius	32
2.5 Maximum mass for a given surface density(ρ_b)	33
2.6 Maximum mass for a given central density (ρ_0)	36
2.7 Maximum mass for different EOS	36
2.8 Maximum mass for a charged star	37
2.9 Discussions	39

3	Role of Pressure Anisotropy on the Maximum Mass of Cold Compact Stars	43
3.1	Introduction	43
3.2	Anisotropic model	45
3.3	Regularity and matching conditions	47
3.4	Physical applications	49
3.4.1	Numerical results	51
3.4.2	Behavior of dynamical variables	51
3.5	Maximum mass and Surface redshift	53
3.6	Static charged sphere with anisotropic pressure	55
3.6.1	Charged anisotropic model	56
3.6.2	Physical application	58
3.6.3	Generalisation of maximum mass calculation	60
3.7	Discussion	61
4	Strange Star with Density Dependent Bag Parameter and Color Superconductivity	63
4.1	Introduction	63
4.2	Strange star	67
4.3	Properties of strange matter in bag model	69
4.4	Vaidya-Tikekar model	72
4.4.1	An effective bag constant	74
4.5	Density dependent bag parameter	76
4.6	Thermodynamics of CFL phase	77
4.6.1	EOS in the CFL phase with a constant B	78
4.6.2	EOS in CFL phase with density dependent B	79
4.7	Application of VT model to EOS in the CFL phase	81
4.8	Discussion	85
5	Generalisation of Vaidya-Tikekar model to Higher Dimensions	87
5.1	Introduction	87
5.2	Anisotropic compact star model in higher dimensions	89
5.3	Physical applications	93
5.3.1	Numerical result	94
5.4	Maximum mass and Surface red-shift	99
5.5	Discussion	102
6	Summary of the Work and Concluding Remarks	104
	Bibliography	109
