<i>Summary</i>	xviii
CHAPTER I	
Introduction	
1.1 The context	1
1.2 Sikkim perspective	2
1.3 Approach to agro-ecosystem studies	3
1.4 Hypotheses and objectives	4
CHAPTER II	
Review of literature	9
CHAPTER III	
Study area, cardamom agroforestry and stand characteristics	
3.1 Prelude	18
3.2 The Sikkim Himalaya	19
3.3 Large cardamom	
3.3.1 Agroforestry	21
3.3.2 Local cultivars and ecological amplitude	22
3.3.3 Economics	23
3.3.4 Ecological sustainability and future perspectives	25
3.3.5 The future of large cardamom farming	27
3.4 Site characteristics	
3.4.1 Study area	28
3.4.1.1 Location and climate	28

3.4.1.2 Plantations	29
3.4.2 Geology	30
3.4.3 Bulk density	31
3.5 Stand structure	
3.5.1 Diameter at breast height	31
3.5.2 Tree height	32
3.5.3 Tree density, parabolic volume and conic surface	32
3.5.4 Tree basal area	33
3.5.5 Cardamom bush density, tiller number and basal area	34
3.5.6 Canopy architecture and shade effect	35
3.5.7 Stand tree density management	36
CHAPTER IV	
Productivity, energetics and efficiencies	
4.1 Introduction	49
4.2 Materials and methods	
4.2.1 Biomass, productivity and litter production	51
4.2.2 Caloric content, energy fixation and efficiencies	53
4.3 Results	
4.3.1 Stand structure and litter production	55
4.3.2 Standing biomass and net primary productivity	56
4.3.3 Energy value, energetics and efficiencies	59
4.4 Discussion	63

CHAPTER V

Root nodule production, nitrogen fixation efficiency and energetics

5.1 Introduction	92
5.2 Materials and methods	
5.2.1 Root nodule biomass and production	94
5.2.2 Nitrogenase activity	95
5.2.3 Energetics and energy cost analysis	96
5.3 Results	
5.3.1 Root nodule occurrence	97
5.3.2 Root nodule biomass and production	97
5.3.3 Nodule moisture and nitrogen concentration	100
5.3.4 Nitrogenase activity	100
5.3.5 Nitrogen fixation and energy cost analysis	103
5.4 Discussion	105

CHAPTER VI

Litter decomposition

6.1 Introduction	127
6.2 Materials and methods	
6.2.1 Litter decomposition	129
6.2.2 Rainfall, moisture and temperature determinations	130
6.2.3 Analytical methods	131
6.2.4 Statistical analysis and decomposition constant	131
6.3 Results	
6.3.1 Loss of ash-free mass	132
6.3.2 Nutrient loss and release	134
6.3.3 Energy loss	137
6.3.4 Lignin	138
6.3.5 Relationships between decomposition rates, litter quality and environmental factors	139

6.4 Discussion	140
CHAPTER VII	
Soil nutrient dynamics	
7.1 Introduction	172
7.2 Materials and methods	174
7.2.1 Statistical analysis	176
7.3 Results	
7.3.1 Moisture	176
7.3.2 pH	176
7.3.3 Organic carbon	178
7.3.4 Soil organic matter	178
7.3.5 Nitrogen	
7.3.5.1 Total-N	179
7.3.5.2 Inorganic-N	181
7.3.5.2.1 Ammonium-N	181
7.3.5.2.2 Nitrate-N	181
7.3.5.2.3 Nitrification	182
7.3.5.2.4 Mineralization	183
7.3.6 Phosphorus	
7.3.6.1 Total-P	184
7.3.6.2 Inorganic-P	185
7.3.6.3 Organic-P	186
7.3.6.4 Available-P	186
7.3.6.5 Fractionated forms of phosphorus	187
7.4 Discussion	188
CHAPTER VIII	
Stand nutrient dynamics	
8.1 Introduction	217
8.2 Materials and methods	
8.2.1 Field sampling and nutrient analysis	218

8.2.2 Nutrient standing states and flow rates	219
8.2.3 Computation of nutrient uptake, retention, return and turnover time	221
8.3 Results	
8.3.1 Nutrient concentrations and standing states	221
8.3.2 Nutrient return to floor and turnover rates	223
8.3.3 Nutrient uptake, retranslocation and turnover time	224
8.3.4 Nutrient use efficiency and nutrient cycling	225
8.4 Discussion	227
