

CONTENTS

	<u>Page</u>
CHAPTER 1 : Introduction ... ..	1
CHAPTER 2 : Interaction of copper ion with some Food Dyes ... ..	17
Experimental ... ..	21
Results and Discussion ... ..	22
Summary and Conclusion ... ..	37
CHAPTER 3 : Studies on some Physical and Chemical Properties of Dyes ... ..	39
Experimental ... ..	43
A. Preparation of the stock Dye solution ... ..	43
(a) Studies on physical properties	43
(b) Effect of chemical reagents on dyes ... ..	44
(c) Comparative study of the dyeing and dedyeing properties of wool, silk, terylene and nylon, under the same conditions	44
Results and Discussion ... ..	45
Summary and Conclusion ... ..	55
CHAPTER 4 : Effect of Microorganisms on some Food Dyes ... ..	56
Experimental ... ..	56

	<b>Page</b>
A. Organisms used and their maintenance	56
B. Preparation of inoculum ...	57
C. Determination of antimicrobial activity ...	57
D. Determination of microbial degradation of Dyes ...	58
E. Estimation of Dye ...	59
Results and Discussion ...	59
Summary and Conclusion ...	64
 <b>CHAPTER 5: Formation of Nitrosamines from Dyes and Effect of Additives on the Formation of Nitrosamines ...</b>	 <b>65</b>
Detection and Identification of Nitrosamines ...	68
Experimental ...	71
Results and Discussion ...	73
Summary and Conclusion ...	77
 <b>CHAPTER 6: Detection and Identification of Oil Soluble Natural and Synthetic Colours from Foods ...</b>	 <b>79</b>
Experimental ...	80
A. Method of Mitra <i>et al.</i> ...	80
B. Roy's Method ...	81
C. A. O. A. C. Method ...	81

	<b>Page</b>
D. Janick's method                   ...	82
E. Bose <u>et al.</u> 's method           ...	82
F. Development of the present method	83
G. Recommended method           ...	83
Discussion                   ...           ...	88
Summary and Conclusion           ...	90
<b>CHAPTER 6A: Detection and Identification of</b>	
<b>Carotenoids from Foods           ...</b>	<b>91</b>
Experimental                   ...           ...	92
A. Wall and Kelley method       ...	92
B. Moore and Ely method       ...	93
C. A. G. A. C. method           ...	93
D. Jacobs's method           ...           ...	93
E. Development of the present method	95
F. Recommended method           ...	95
Results and Discussion           ...	98
Summary and Conclusion           ...	100
<b>CHAPTER 7 : Development of a new Method for</b>	
<b>the Estimation of Dye content   ...</b>	<b>101</b>
Experimental                   ...           ...	101
A. Titanous Chloride Method     ...	101
B. A. G. A. C. Method           ...	102

	<u>Page</u>
C. Phospho or Silicotungstic acid Method                    ...                    ...	105
D. Bogoslevskii Method                    ...	105
E. Colorimetry                    ...                    ...	105
F. Development of the present Method	106
G. Recommended Method                    ...	107
Results and Discussion                    ...	108
Summary and Conclusion                    ...	112
 CHAPTER 8 : Identification and Standardisation of some Blue and Green Food Dyes                    ...	 113
Experimental                    ...                    ...	113
A. Effects of Acids and Alkalies on the Dyes                    ...                    ...	113
B. Paper Chromatography                    ...	115
C. Exposure under U.V. light                    ...	115
D. Spectrophotometry                    ...	115
Results and Discussion                    ...	116
Summary and Conclusion                    ...	120
 GENERAL CONCLUSION                    ...                    ...	 121
 REFERENCES                    ...                    ...	 131
