

CONTENTS

PART I

	Pages
INTRODUCTION -----	1--7
MATERIAL AND METHOD -----	8--14
OBSERVATIONS:	
I. MALARIAL INFECTION IN <u>P. elegans caniceps</u> .	
Specimen no. 1	
Erythrocytic forms -----	15--16
Tissue forms:	
A. Merocysts of <u>Hepatocystis</u> :	
(a) Lung forms -----	17--22
(b) Spleen forms -----	22--24
B. Schizonts of <u>Rayella</u> type:	
(a) Lung forms -----	24--26
(b) Liver forms -----	26--28
II. MALARIAL INFECTION IN <u>P. magnificus</u> .	
Specimen no. 2 showing <u>Hepatocystis</u> .	
Erythrocytic forms -----	29--31
Specimen no. 3 showing a mixture of	
<u>Hepatocystis</u> and <u>Rayella</u> .	
Erythrocytic forms -----	31--32
Tissue forms:	
A. Merocysts of <u>Hepatocystis</u> :	

	Pages
(a) Lung forms -----	33
(b) Spleen forms -----	36--38
B. Schizonts of <u>Rayella</u> type.	
(a) Lung forms -----	36
(b) Liver forms -----	36--38
III. MALARIAL INFECTION IN <u>Hylometes alboniger</u> .	
A. Description of the early tissue stages--	39--41
B. The process of formation of cluster ----	41
DISCUSSION -----	42--56
SUMMARY -----	57--60

PART II

INTRODUCTION -----	61--64
MATERIAL AND METHOD -----	65--72
OBSERVATIONS:	
I. MALARIAL INFECTION IN <u>Tragopan satyra</u> .	
A. Erythrocytic forms -----	73--74
B. Tissue forms -----	75--76
II. MALARIAL INFECTION IN <u>Ithagenes cruentus</u> .	
A. Erythrocytic forms -----	77--79

	Pages
B. Tissue forms:	
(a) Liver forms -----	79--80
(b) Kidney forms -----	80
 III. MALARIAL INFECTION IN <u>Niltava sundara</u> .	
A. Erythrocytic forms -----	82--84
B. Tissue forms -----	85
 IV. MALARIAL INFECTION IN <u>Xantholaema</u> <u>haematocepala</u> .	
A. Erythrocytic forms -----	86--89
B. Tissue forms -----	89
 V. MALARIAL INFECTION IN <u>Leioptila capistrata</u> .	
A. Erythrocytic forms -----	90--92
B. Tissue forms -----	93
 VI. MALARIAL INFECTION IN <u>Aethopyga saturata</u> .	
A. Erythrocytic forms -----	94--95
B. Tissue forms -----	95
 DISCUSSION -----	96--112
SUMMARY -----	113--117

PART III

INTRODUCTION -----	118--120
--------------------	----------

	Pages
MATERIAL AND METHOD -----	121--123
OBSERVATIONS:	
I. Merocysts of <u>Hepatocystis</u> .	
A. Acridine orange method:	
1. Lung form of <u>P. elegans caniceps</u> .-	124
2. Spleen form of <u>P. magnificus</u> -----	124
B. Thioflavine method:	
1. Lung form of <u>P. magnificus</u> -----	125
2. Spleen form of <u>P. magnificus</u> -----	125
II. Tissue schizonts of <u>Rayella</u> .	
A. Acridine orange method:	
1. Lung form of <u>P. magnificus</u> -----	125
2. Liver form of <u>P. magnificus</u> -----	126
B. Thioflavine method:	
1. Liver form of <u>P. elegans caniceps</u> -	126
2. Liver form of <u>P. magnificus</u> -----	126
DISCUSSION -----	127--130
SUMMARY -----	131--132
REFERENCES-----	133--142
