

# TABLE OF CONTENTS

<b>Chapter</b>	<b>Description</b>	<b>Page No.</b>
Declaration		ii
Certificate		iii
Abstract		vi
Acknowledgement		vii
Preface		ix
List of Tables		xvi
List of Figures		xvii
List of Appendices		xxi
<b>1. General Introduction and review</b>		<b>1-29</b>
1.1	General introduction	2
1.2	Objectives	5
1.3	Review of literature	6
1.3.1	Cancer	6
1.3.1.1	Cell signaling pathways in cancer	7
1.3.1.1.1	The PI3K/AKT signaling pathway	7
1.3.1.1.2	The Ras/MAPK pathway	7
1.3.2	Apoptosis	8
1.3.2.1	Extrinsic Pathway of Apoptosis	9
1.3.2.2	Intrinsic Pathway of Apoptosis	9
1.3.3	Cancer treatment	11
1.3.3.1	Conventional cancer therapies	11
1.3.3.2	Advanced cancer therapies	11
1.3.3.2.1	Stem cells therapy	11
1.3.3.2.2	Targeted drug therapy	12
1.3.3.3	DNA metabolism enzymes as target for cancer therapeutics	13

1.3.4	Targeting Oxidative Stress as Anticancer Therapy	15
1.3.5	Importance of medicinal plant in drug discovery	16
1.3.6	Approaches to drug discovery from natural products	17
1.3.7	Natural products as anticancer agents	19
1.3.8	Darjeeling Himalayan medicinal plants	21
1.3.8.1	Overview of Darjeeling medicinal plants	21
1.3.8.2	Selection of Darjeeling Himalayan medicinal plants for the present study	122
1.3.8.3	<i>Astilbe rivularis</i> , a Himalayan herb	23
1.3.8.3.1	Geographical distribution	23
1.3.8.3.2	Taxonomic classification	23
1.3.8.3.3	Morphology	24
1.3.8.3.4	Phytochemistry	25
1.3.8.3.5	Biological properties	26
<b>2.</b>	<b>Screening and evaluation of phytochemical constituents, and pharmacological potential of indigenous medicinal plants from Eastern Himalayan region of India</b>	<b>30-55</b>
2.1	Introduction	31
2.2	Materials and methods	33
2.2.1	Materials	33
2.2.1.1	Cell culture, culture media and chemicals	33
2.2.2	Plant samples	33
2.2.2.1	Collection site of medicinal plants	33
2.2.2.2	Selection of Darjeeling Himalayan herb for the study	33
2.2.2.3	Taxonomic classification of selected medicinal plants	34
2.2.3	Work plan	36
2.2.4	Preparation of plant extract	36
2.2.5	Qualitative analysis of phytochemicals	37
2.2.6	Determination of antioxidant potential of plant extracts by in vitro assay	38

2.2.6.1	DPPH radical scavenging activity	38
2.2.6.2	ABTS radical scavenging activity	38
2.2.7	Determination of antimicrobial potential of plant extracts	38
2.2.7.1	Antibacterial activity	38
2.2.8	Determination of cytotoxic potential of plant extracts	39
2.2.8.1	MTT Assay	39
2.2.9	GC-MS analysis	39
2.3	Results	40
2.3.1	Qualitative analysis of phytochemicals	40
2.3.2	In vitro antioxidant assay	40
2.3.3	Antibacterial activity	41
2.3.4	In vitro cytotoxicity	43
2.3.5	Quantitative analysis of phytochemical compounds by GC-MS	44
2.3.6	Determination of relative abundance of different class of compounds in the methanolic extracts	51
2.4	Discussion	52
<b>3.</b>	<b>Isolation and characterization of bioactive compound from <i>Astilbe rivularis</i> rhizome</b>	<b>56-71</b>
3.1	Introduction	57
3.2	Materials and methods	58
3.2.1	Cell line, culture conditions and drug preparation	58
3.2.2	Isolation and purification of bioactive compound from <i>A. rivularis</i> rhizome and its characterization	59
3.2.2.1	Extraction of <i>A. rivularis</i> rhizome	59
3.2.2.2	Isolation of bioactive compounds from plant extract by silica gel column chromatography	60
3.2.2.3	Thin layer chromatography	60
3.2.2.4	High performance liquid chromatography	61

3.2.5	Cytotoxicity assay	61
3.2.6	Physical and Structural Characterization of the purified bioactive compound	61
3.2.6.1	Infrared (IR) Spectroscopy analysis	61
3.2.6.2	Nuclear Magnetic Resonance (NMR) spectroscopic analysis	61
3.2.6.3	High Resolution Mass Spectrometry (HRMS) analysis	62
3.3	Results	62
3.3.1	Bioassay-guided screening of the <i>A. rivularis</i> rhizome extract for cytotoxic activity	62
3.3.2	Determination of purity of active metabolite	64
3.3.3	Determination of purity of bioactive compound A11 using HPLC	64
3.3.4	Physicochemical characterization of A11	65
3.3.4.1	Infrared spectrometry analysis	65
3.3.4.2	NMR	66
3.4	Discussion	69
<b>4</b>	<b>Biological evaluation of Stigmasta-5(6), -22 (23)-dien-3-beta-yl acetate (A11) from <i>Astilbe rivularis</i> rhizome and its potential as antitumor agent</b>	<b>72-91</b>
4.1	Introduction	73
4.2	Materials and methods	74
4.2.1	Chemicals and reagents	74
4.2.2	Cell line, culture conditions and drug preparation	75
4.2.3	Antibacterial activity	75
4.2.4	Cytotoxicity assay	75
4.2.5	DHFR assay	75

4.2.6	Spectrofluorimetric studies on interaction of A11 with	76
4.2.7	Comparative study on interaction of A11 and MTX with hDHFR by molecular docking	76
4.2.8	Determination of A11-DNA interaction by UV spectroscopy	76
4.2.9	Scanning electron microscopy (SEM) analysis	76
4.2.10	Determination of intracellular ROS generation	77
4.2.11	DNA fragmentation assay	77
4.2.12	Agarose Gel Electrophoresis of fragmented DNA	77
4.2.13	Reverse Transcriptase PCR (RT-PCR) analysis of apoptotic genes	77
4.2.13.1	RNA extraction and first strand cDNA synthesis	77
4.2.13.2	RT-PCR analysis	78
4.2.14	Sodium dodecyl sulphate-polyacrylamide gel electrophoresis (SDS-PAGE)	79
4.2.15	Immunoblot analysis of caspases	79
4.2.16	Enzyme linked immunosorbent assay (ELISA)	80
4.	Statistical analysis	80
2.17		
4.3	Results	80
4.3.1	Antimicrobial activity of A11	80
4.3.2	In vitro cytotoxic activity of A11	81
4.3.3	UV-Vis spectrometric analysis of interaction of A11 with DNA	82
4.3.4	Inhibition of hDHFR by A11 treatment	82
4.3.5	Comparative study on interaction of A11 and MTX with hDHFR by molecular docking	83
4.3.6	Interaction of hDHFR with A11 as studied by fluorescence spectroscopy	84
4.3.7	Morphological analysis of A11 treated normal and cancer cells by SEM	85

4.3.8	Effect of A11 treatment to ACHN cells on ROS generation and genomic DNA fragmentation	86
4.3.9	RT-PCR analysis of apoptosis-regulating genes	87
4.3.10	Quantification of the pro-apoptotic proteins through ELISA	88
4.3.11	Western blot analysis of pro-apoptotic proteins in ACHN cells treated with A11	88
4.4	Discussion	89
<b>5</b>	<b>Summary and conclusion</b>	<b>92-94</b>
<b>6</b>	<b>Future perspectives</b>	<b>95</b>
<b>7</b>	<b>Bibliography</b>	<b>96-115</b>
<b>8</b>	<b>Appendices</b>	<b>116-132</b>
