

List of tables:

⊙ Chapter 1

- Table- 1.1: Renewable and non-renewable resource contributions to export
Table-1.2: Divisions of Indian Fisheries
Table – 1.3: Fish Production in different plan periods and average annual growth rate.

Table-1.4: Marine Area and Potential Resources
Table- 1.5: Area of continental shelf, number of landing centers & number of fishing villages of Maritime States

Table-1.6: Present marine fleet strength of India

⊙ Chapter 2

- Table- 2.1: Potential of fishery resources in the Indian EEZ at different depths: (in million tonnes)
Table-2.2: State-wise summary of the list of approved units to EU
Table-2.3: Marine fish production from 1999 to 2004

⊙ Chapter 3

⊙ Chapter 4

- Table - 4.1: Potential of fishery resources in the Indian EEZ at different depths in million tonnes
Table – 4.2: Present fleet strength of Indian Maritime states
Table - 4.3: Regression Co-efficient and R^2 for Frisch's Confluence Analysis for the year 2003
Table - 4.4: Regression Co-efficient and R^2 for Frisch's Confluence Analysis for the year 2005
Table - 4.5: Results of DEA of considering motorized crafts (X_{12}) & continental shelf (X_{22}) as inputs for 2003
Table - 4.6: Results of DEA of considering motorized crafts (X_{12}) & continental shelf (X_{22}) as inputs for 2005
Table - 4.7: Regression Co-efficient and R^2 for Frisch's Confluence Analysis of category-I for the year 2003
Table - 4.8: Regression Co-efficient and R^2 for Frisch's Confluence Analysis of category-I for the year 2005
Table - 4.9: Regression Co-efficient and R^2 for Frisch's Confluence Analysis of category-II for the year 2003
Table - 4.10: Regression Co-efficient and R^2 for Frisch's Confluence Analysis of category-II for the year 2005
Table - 4.11: Input Output Combination for DEA as Determined by Frisch's Confluence Analysis
Table - 4.12: Results of DEA of considering inputs in category-I, (mechanized crafts (X_{11}) and motorized crafts (X_{12}) as inputs) for the year 2003
Table - 4.13: Results of DEA of considering inputs in category-I (mechanized crafts (X_{11}) and motorized crafts (X_{12}) as inputs) for the year 2005
Table - 4.14: Results of DEA of considering inputs in category-II, (continental shelf (X_{22}) and number of landing centers (X_{23}) as inputs) for 2003

Table - 4.15: Results of DEA of considering inputs in category-II, (continental shelf (X_{22}) and number of landing centers (X_{23}) as inputs) for 2005

⊙ Chapter 5

Table-5.1: Increment of the Numbers of Mechanized Boats Over The Years Within 12 Nautical Miles.

Table-5.2: Results of Frisch's Confluence Analysis for the year 2005

Table-5.3: Efficiency Scores of Maritime States for the Year 2005 with respect to Single DEA Input

Table-5.4: Relative Performance Ranks of the Maritime states for the year 2005 with respect to single DEA input

Table-5.5: Excess inputs used by the Maritime states for the year 2005 with respect to Single DEA Input

Table-5.6: Percentage of Production improvement required by the Maritime states for the year 2005 with respect to Single DEA Input

Table-5.7: Peer States of the Maritime states for the year 2005 with respect to Single DEA Input

Table-5.8: Input Output Combination for DEA as Determined by Frisch's Confluence Analysis

Table-5.9: Results of DEA of considering Number of trawlers (X_1) & Number of effective fishermen (X_6) as inputs

Table-5.10: Results of DEA of considering trawlers (X_1) and gill-netters (X_4) as inputs.

⊙ Chapter 6

List of figures:

⊙ Chapter -1

Figure - 1.1: Indian EEZ

Figure - 1.2: Taxonomy of Efficiency Measurement Techniques

⊙ Chapter -2

Figure - 2.1: State-wise marine fish production for the years from 1999 through 2004

⊙ Chapter- 3

Figure - 3.1: Input oriented efficiency

Figure - 3.2: Output oriented efficiency

Figure - 3.3: Scale Efficiency

⊙ Chapter -4

Figure- 4.1: Number of motorized and non-mechanized fleets in different maritime states in 2003 and 2005

⊙ Chapter -5

Figure-5.1: Number of Mechanized boats in Different Maritime States in 2003 & 2005
