

CONTENTS

	Page
INTRODUCTION	1
MATERIALS AND METHODS.....	16
Patients.....	16
Collection of blood.....	18
Source of complement.....	19
Separation of lymphocytes.....	19
Separation of CD4 ⁺ and CD8 ⁺ T-cells from peripheral blood lymphocytes with the help of Dynabeads.....	21
HLA typing and detection of HLA-alloantibodies..	21
Quantitative estimation of serum proteins (IgG & IgM) by Ammonium sulphate precipitation technique	23
Quantitative estimation of serum proteins (IgG & IgM) by immunodiffusion technique.....	24
Mitogen	24
Cell Viability test.....	25
<u>In vitro</u> cell culture.....	25
Measure of blastogenesis.....	25
Statistical analysis.....	26
RESULTS	27
HLA phenotype and gene frequencies.....	27
Haplotype, Delta value and chi-square (χ^2).....	27

	Page
Incidence of HLA alloantibodies against class I and class II antigens.....	28
Quantitative estimation of IgM and IgG by column chromatography.....	30
Quantitative estimation of IgM and IgG by immunodiffusion technique.....	31
T-lymphocytes, B-lymphocytes and their respective blast cells in peripheral blood.....	32
Percentage and the ratio of CD4 ⁺ and CD8 ⁺ T-cells.....	32
Blastogenic transformation of peripheral blood lymphocytes <u>in vitro</u> with PHA-P.....	33
 DISCUSSION.....	 36
 SUMMARY	 49
 APPENDIX.....	 53
Tables	54
Figures.....	104
 BIBLIOGRAPHY.....	 117
