Chapter- I Introduction and Background of the Study Area	1-43
1.1 Introduction	1
1.2 Study Area	4
1.3 Physical setup of the study area	5
1.3.1 Geology	8
1.3.2 Relief	10
1.3.3 Drainage	11
1.3.3.1 The Mahananda River	13
1.3.3.2 The Balason River	13
1.3.3.3 The Mechi River	14
1.3.3.4 The Tista River	15
1.3.4 Climate	16
1.3.5 Natural Vegetation	18
1.3.5.1 Tropical Deciduous forest	18
1.3.5.2 Subtropical Broadleaf Evergreen Forests	19
1.3.6 Tea Garden	19
1.3.6.1 Marshy area of Mahananda Barrage	20

1.3.7	Land use and Land cover	22
1.3.7.1	Impact of soil properties on Land use and land cover	24
1.3.7.2	Land use & land cover of Siliguri subdivision	24
1.3.7.2.1	Land use	25
1.3.7.2.2	Land Cover	27
1.4	Statement of the problems	29
1.5	Aims and Objectives	30
1.6	Hypothesis	31
1.7	Methodology	31
1.8	Scope and Purpose	33
1.9	Literature review	34
	References	39
Chapter- II	Soil properties and agricultural land use	44-83
2.1	Introduction	44
2.2	Soil Properties and Agricultural land use of Siliguri Sub-Division	45
2.3	Assessment of the soil properties and associated agricultural land use	49
2.3.1	Soil pH	50
2.3.2	Soil Organic Carbon	56
2.3.3	Soil Nitrogen	58
2.3.4	Soil Phosphorus	64
2.3.5	Soil Potassium	67
2.3.6	Soil Sulphur	70
2.3.7	Soil Texture	73
2.4	Conclusion	80
	References	81

Chapter- III	Impact of Soil Properties on Agricultural productivity	84-122
3.1	Introduction	84
3.2	Perspectives on Agricultural Productivity	86
3.3	Impact of Soil Properties on Agricultural Productivity	88
3.3.1	Impact of Physical Properties of soil on Agricultural Productivity	91
3.3.2	The impact of Soil Texture on agricultural productivity of Siliguri Sub-Division	92
3.3.3	Soil colour	96
3.3.4	Soil Density	101
3.4	Soil Chemical Properties	
3.4.1	The impact of Soil pH on agricultural productivity of Siliguri Subdivision	104
3.4.2	Impact of Soil Phosphorus on agricultural Productivity of Siliguri subdivision	109
3.4.3	Impact of Soil Potassium on agricultural Productivity of Siliguri subdivision	111
3.4.4	Impact of Soil Sulphur on agricultural Productivity of Siliguri subdivision	113
3.4.5	Impact of Organic Carbon on agricultural Productivity of Siliguri subdivision	114
3.5	Calculating Agricultural Productivity Index according to Mahummad Shafi	116
3.5.1	Interpretation of Agricultural Productivity Index of Siliguri Subdivision by M. Shafi.	117
3.6	Conclusion	119
	References	120
Chapter- IV	USDA land capability classification and Agricultural Land use planning	123-176
4.1	Introduction	123
4.2	USDA Land Capability Classification	124

4.3	Data Base and Methodology	124
4.4	USDA Land Capability Classification	125
4.4.1	Land Capability Class	126
4.4.2	Capability Subclass	127
4.5	USDA land capability index regions of different blocks in Siliguri subdivision	128
4.6	Zonation of Land Capability Classification by USDA	130
4.7	Interpretation of LCI Classes in Siliguri Sub-Division	145
4.8	USDA Soil Taxonomy	146
4.8.1	Soil Taxonomy and Soil Classification	147
4.8.2	The Attributes of Soil Taxonomy	148
4.9	Characteristics of different taxonomic soil order	150
4.10	Interpretation of Taxonomic classification	153
4.11	Land use Planning with reference to USDA Land Capability Classification	155
4.12	Relationship between Land Use Planning with USDA Land Capability Classification	156
4.12.1	Land use of Siliguri Sub-Division	158
4.12.2	Necessity of Land use planning in Siliguri Sub-Division	161
4.13	Impact of soil properties on land use planning	163
4.13.1	Impact Soil pH on land use planning	163
4.13.1.1	Crop Selection	163
4.13.1.2	Soil Fertility Management	164
4.13.1.3	Land Suitability for Forestry and Horticulture	164
4.13.1.4	Environmental Conservation	164
4.13.1.5	Water Management	165
4.13.1.6	Building and Infrastructure Development	165
4.13.1.7	Soil Conservation	165
4.13.2	Impact of soil texture on Land use planning in Siliguri Sub-Division	166
4.13.2.1	Agricultural Suitability	166
4.13.2.2	Water Management	166
4.13.2.3	Environmental Conservation	167

4.13.2.4	Afforestation and Agroforestry	167
4.13.2.5	Soil Fertility Management	167
4.13.3	Impact of soil density on Land use planning in Siliguri Subdivision	168
4.13.3.1	Agricultural Suitability	168
4.13.3.2	Water Management	168
4.13.3.3	Soil Conservation and Erosion Control	169
4.13.3.5	Infrastructure Development	169
4.13.4	Impact of soil organic matter and carbon on land use planning	169
4.13.4.1	Enhancing Soil Fertility	170
4.13.4.2	Improving Soil Structure	170
4.13.4.3	Supporting Sustainable Land Use Practices	170
4.13.4.4	Promoting Environmental Conservation and Biodiversity	170
4.13.4.5	Rehabilitation and Restoration of Degraded Lands	170
4.13.4.6	Economic and Social Benefits	171
4.13.5	Impact of NPK on land use planning in Siliguri subdivision	171
4.13.5.1	Agricultural Suitability	171
4.13.5.2	Nutrient Management Strategies	172
4.13.5.3	Crop Rotation and Nutrient Cycling	172
4.13.5.4	Economic Benefits	172
4.14	Conclusion	173
	References	174
Chapter- V	Agricultural Problems and Soil Management	177-202
5.1	Introduction	177
5.2	Problems of agriculture in Siliguri Subdivision	177
5.2.1	Land Fragmentation	178
5.2.2	Water supply and irrigation issues	178
5.2.3	Heavy rainfall and water logging in some agricultural field	178

5.2.4	Limited access to credit and finance	179
5.2.5	Lack of Mechanization	179
5.2.6	Pest and disease management	180
5.2.7	Marketing and price fluctuation	181
5.2.8	Limited awareness to modern agricultural practises	181
5.2.9	Lack of government support	181
5.2.10	Labour shortage	182
5.2.11	Problems of fertilizers	182
5.3	Soil Management	183
5.3.1	Importance of Soil Management	185
5.3.1.1	Enhancing Agricultural Productivity	185
5.3.1.2	Ensuring Food Security	185
5.3.1.3	Environmental Conservation	186
5.3.1.4	Cost Savings and Efficiency	186
5.3.1.5	Supporting Sustainable Agriculture	186
5.3.1.6	Responsible Land Use	186
5.3.1.7	Food Security and Nutrition	186
5.3.2	Key Strategies for Soil Management	187
5.3.2.1	Conservation Tillage	187
5.3.2.2	Crop Rotation and Diversification	187
5.3.2.3	Cover Cropping	187
5.3.2.4	Organic Matter Management	188
5.3.2.5	Precision Agriculture	188
5.3.3	Benefits of Sustainable Soil Management	189
5.3.3.1	Improved Soil Health and Fertility	189
5.3.3.2	Water Regulation and Conservation	189
5.3.3.3	Reducing Chemical Inputs and Environmental Impacts	189
5.3.3.4	Promoting Biodiversity and Ecosystem Services	189
5.3.3.5	Enhancing Rural Livelihoods	190
5.3.3.6	Supporting food security	190
5.3.3.7	Preserving natural resources	190
5.3.3.8	Empowering farmers	190

5.4	Farmer's perception in the adoption of modern technologies	191
5.4.1	Awareness and knowledge	192
5.4.2	Economic viability	192
5.4.3	Traditional farming practise	192
5.4.4	Access to technology and training	192
5.4.5	Risk and uncertainty	193
5.4.6	Social influence and peer network	193
5.4.7	Environmental concern	193
5.4.8	Government support and policies	193
5.4.9	Ease of use and compatibility	193
5.4.10	Demonstration and extension service	193
5.5	Kendall's W method of Farmer's perceptions	194
5.5.1	Introduction	194
5.5.2	Methodology	195
5.5.3	Results and discussion	198
5.5.4	Conclusion	201
	References	201
Chapter- VI	Major findings and conclusion	203-206
	Bibliography	207
	Appendices	214
