List of Figures	x – xii
List of Annexures	xiii
List of Plates	xiv – xv
<b><i>Chapter -1</i></b>	
<b>INTRODUCTION</b>	<b>01 – 26</b>
1.1. Biological Diversity	01
1.2. Plant community structure	05
1.3. Topographical description	05
1.3.1. Elevation	05
1.3.2. Slope and aspect	06
1.3.3. Drainage	07
1.3.4. Road	07
1.3.5. Edaphic conditions	07
1.4. Biodiversity pattern	07
1.4.1. Latitudinal pattern	07
1.4.2. Life-form composition pattern	08
1.4.3. Factors correlated with diversity	08
1.4.4. Ecotone zone	08
1.4.5. Forest type variation	08
1.4.6. Species distribution range	08
1.4.7. Biodiversity scale factor	09
1.5. Community	09
1.5.1. Frequency and Relative Frequency	09
1.5.2. Density and Relative Density	09
1.5.3. Abundance and Relative Abundance (Dominance)	09
1.5.4. Importance Value Index	10
1.6. Diversity Indices	10

1.7.	Plant Biomass	10
1.7.1.	Destructive sampling technique or harvest mapping technique	10
1.7.2.	Non-destructive sampling technique	11
1.7.2.1.	The biomass assessment using the field data	11
1.7.3.	Measurements based on remotely sensed data taken from airborne/ space borne systems	11
1.7.3.1.	Satellite derived NPP Products	11
1.7.4.	Semi-empirical modelling – Estimation using models	12
1.8.	Relation between productivity and species richness	12
1.9.	Relationship between species richness with biomass along the elevation	13
1.9.1.	Positive correlations of diversity and productivity	14
1.9.2.	Negative correlation of diversity and productivity	14
1.10.	Summary of some related studies around the globe	15
1.11.	Hills, Mountain and biodiversity	25
1.12.	The Sikkim Himalaya	25
1.13.	The Hypothesis	25

## ***Chapter - 2***

### **OBJECTIVES**

26

## ***Chapter - 3***

### **STUDY AREA**

27 – 46

3.1.	The Himalayan State of Sikkim	27
3.2.	Distribution of Forest Vegetation <i>vis-à-vis</i> Elevation	29
3.2.1.	Low Hill Forests (tropical to sub-tropical, up to 900 m)	29
3.2.2.	Middle Hill Forests (subtropical, 750 – 1500 m)	29
3.2.3.	Upper Hill forests (Wet temperate, 1500 – 2700 m)	30
3.2.4.	Rhododendron-Conifer Zone (cold temperate or sub-alpine, 2700 – 3600 m)	31
3.3.	Occurrence and distribution of forest types	31
3.3.1	Forest Type Distribution as per Champion and Seth (1968)	33
3.3.1.1.	Tropical Semi-Evergreen Forests-3C/C1 (300 – 900 m)	33
3.3.1.2.	Sub-Tropical Mixed Broad Leaved Hill Forests-8B/C1 (900 – 1800 m)	33
3.3.1.3.	Upper Hill Himalayan Wet Temperate Forests-11B/C1 (1800 – 2400 m)	33
3.3.1.4.	Sub-alpine Forests (2400 – 3000 m)	33
3.3.1.5.	Moist Alpine Forests (2700 – 3700 m)	33

3.3.1.6.	Dry Alpine Forests (3700 – 4500 m)	34
3.4.	Location of East District of Sikkim	34
3.4.1.	Protected areas in East District	36
3.5.	Plant diversity in the Sikkim Himalaya	37
3.5.1.	Endangered plants	38
3.5.1.1.	Number and status of endangered plants	38
3.5.2.	Endemic plants	40
3.5.3.	Medicinal plants	40
3.6.	Elevation	40
3.7.	Soil	41
3.8.	Climate	41
3.9.	Drainage System	41
3.10.	Communication network	44
3.11.	Socio-economic status	44
3.12.	Fauna	46

## ***Chapter - 4***

### **MATERIALS AND METHODS**

47 – 57

4.1.	Physiognomy, Climate, Edaphic and Forest Cover Mapping	47
4.1.1.	Elevation	47
4.1.2.	Slope and Aspect	47
4.1.3.	Climate	47
4.1.3.1.	Temperature and Precipitation	47
4.1.4.	Soil	47
4.1.5.	Forest type and density	47
4.2.	Plant diversity	48
4.2.1.	Sampling design	48
4.2.2.	Sampling strategy	48
4.2.3.	Field data collection	49
4.2.3.1.	List-Count Data	50
4.2.4.	Data entry and design	50
4.2.5.	Data analysis	50
4.2.5.1.	Dominance analysis	51
4.2.5.1.1.	Frequency (F) and Relative Frequency (RF)	51
4.2.5.1.2.	Density (D) and Relative Density (RD)	51
4.2.5.1.3.	Abundance (A) and Relative Abundance (RA)	51
4.2.5.1.4.	Important Value Index (IVI)	51
4.2.5.2.	Diversity Indices	52
4.2.5.2.1.	Margalef Index (M)[Sp Richness]	52

4.2.5.2.2.	Simpson's Index (1/D)[dominance]	52
4.2.5.2.3.	Shannon-Wiener Index (H')[Diversity]	52
4.2.5.2.4.	Pielou's Index (e) [Evenness]	53
4.2.6.	Species, Genera and Families richness along the altitude	53
4.2.6.1.	Along 100 m 200 m and 300 m elevation steps	53
4.3.	Endemic species	53
4.4.	Productivity (Biomass)	54
4.4.1.	Name of the species	54
4.4.2.	Circumference at Breast Height (CBH)	54
4.4.3.	Height of trees	54
4.4.4.	Indicator parameters for non-tree species	54
4.4.5.	Basal area	54
4.4.6.	Volume estimation	54
4.4.7.	Biomass estimation	55
4.4.7.1.	Biomass along 100 m elevation steps	55
4.4.7.2.	Biomass along 200 m elevation steps	55
4.4.7.3.	Biomass long 300 m elevation step	55
4.5.	Satellite based productivity	55
4.5.1.	MODIS Productivity	55
4.5.2.	MODIS Algorithms	55
4.5.3.	Landsat-8 NDVI and EVI	55
4.5.3.1.	Data download and process	55
4.5.3.2.	Normalised Difference Vegetation Index (NDVI)	56
4.5.3.3.	Enhanced Vegetation Index (EVI)	56
4.5.3.4.	Data download and process: The website < <a href="http://modis.gsfc.nasa.gov/data/dataproducts.php?MOD_NUMBER=17">http://modis.gsfc.nasa.gov/data/dataproducts.php?MOD_NUMBER=17</a> >	56
4.5.4.	Relationship between MODIS productivity field biomass	56
4.5.5.	Relation between field biomass Satellite EVI	56
4.6.	Relation between species diversity and Plant productivity (biomass) along the altitude	56
4.7.	Multivariate analysis	56
4.7.1.	General Linear Model (GLM)	56
4.7.2.	GLM Modelling in R	57

## ***Chapter - 5***

<b>RESULT: SPECIES RICHNESS ALONG THE ALTITUDE</b>	58 – 83	
5.1.	Topography	58
5.1.1.	Elevation	58
5.1.2.	Slope and Aspect	60
5.1.3.	Climate	63
5.1.3.1.	Temperature	63

5.1.3.2.	Precipitation	63
5.1.4.	Soil	64
5.1.5.	Forest type and density	66
5.2.	Plant diversity	67
5.2.1.	Data entry and design	67
5.2.2.	Data analysis	67
4.2.2.1.	Dominance analysis	69
5.2.2.1.1.	Frequency and Relative Frequency	70
5.2.2.1.2.	Density and Relative Density	70
5.2.2.1.3.	Abundance and relative abundance	70
5.2.2.1.4.	Importance Value Index	71
5.2.2.2.	Diversity Indices	71
5.2.2.2.1.	Margalef Index (MI)	71
5.2.2.2.2.	Simpson's Index	71
5.2.2.2.3.	Shannon-Wiener Index (H')	72
5.2.2.2.4.	Pielou's Index (J) [Evenness]	72
5.2.2.3.	Richness of Species, Genus and Family along the altitude	73
5.2.2.3.1.	Along 100 m elevation step	73
5.2.2.3.2.	Along 200 m elevation step	77
5.2.2.3.3.	Along 300 m elevation step	78
5.2.2.4.	Endemic species	80

## ***Chapter - 6***

### **RESULT: PRODUCTION OF BIOMASS ALONG THE ALTITUDINAL GRADIENT** 84 – 98

6.1.	Biomass Productivity	86
6.1.1.	Field data	86
6.1.1.1.	Circumference at Breast Height (CBH)	86
6.1.1.2.	Tree height	86
6.1.1.3.	Basal area	86
6.1.1.4.	Volume Estimation	86
6.1.1.5.	Biomass estimation	87
6.1.1.5.1.	Along 100 m elevation step	87
6.1.1.5.2.	Along 200 m elevation step	88
6.1.1.5.3.	Along 300m elevation step	89
6.2.	Satellite based relation of Biomass	89
6.2.1.	Landsat-8 NDVI and EVI	89
6.2.2.	Relation between biomass and satellite EVI	90
6.2.3.	MODIS Productivity	98
6.2.4.	Relation MODIS Productivity with Biomass	98

**Chapter - 7**

<b>RESULT: RELATIONSHIP BETWEEN SPECIES RICHNESS AND BIOMASS ALONG THE ALTITUDE</b>	99 – 108
7.1. Relation between species diversity and productivity	99
7.1.1. Conditions in East district of Sikkim	100
7.2. Relation between species diversity and productivity along the altitude	102
7.3. Relation between species richness and other environmental variables – multivariate analysis	104
7.3.1. Correlation of species richness with other factors	104
7.3.2. Relationships between species richness and other variables	105
7.3.3. Relation between diversity with temperature, precipitation and area	106

**Chapter - 8**

<b>DISCUSSION</b>	109 – 123
8.1. Topology	109
8.2. Plant diversity	109
8.3. Dominance analysis	109
8.4. Diversity Indices	112
8.5. Species Richness and Elevation	112
8.5.1. Species richness	113
8.6. Distribution of Trees Shrubs and Herbs along the altitude	113
8.7. Species richness along elevation gradient	114
8.7.1. Along 100 m elevation step	116
8.7.2. Along 200 m and 300 m elevation Steps	116
8.8. Effect of the forest ecotone	117
8.9. Species Richness and Environmental Parameters	118
8.10. Biomass along Altitudinal (Elevation) Gradient	119
8.11. Satellite based correlation	120
8.12. Relationship between Species Richness and Biomass Production along the altitude	121
8.13. Relation of diversity with Temperature, Precipitation and Area	121
8.14. Status of Conservation in the Study area	122

**Chapter - 9**

<b>CONCLUSION</b>	123 – 124
