

List of Tables

Table	Page
4.1 Showing the variation of distance modulus (μ) for Supernova explosion, power law model and exponential model for different value of redshift parameter (z).	66
6.1 Showing the variation of the stability condition of critical point in RS Brane regime with GB terms for different value of γ	88
6.2 Showing the variation of stability condition of critical point in terms of q in RS Brane model with GB terms for different value of γ	88
6.3 Showing the variation of the stability condition of critical point in RS Brane regime without GB terms for different value of γ	89
6.4 Showing the variation of stability condition of critical point in terms of q in RS Brane model without GB terms for different value of γ	90
