Contents	ii
List of Figures	iv
1 Introduction	1
1.1 Basic definitions	1
1.2 Background	3
1.3 Interval graphs and related topics	4
1.3.1 Some characterization of interval graphs	5
1.3.2 Indifference graphs, unit interval graphs and proper interval graphs	7
1.3.3 Probe interval graphs	8
1.3.4 Tolerance graphs and permutation graphs	9
1.3.5 Homogeneous graphs	10
1.3.6 Circular-arc graphs	11
1.4 Interval bigraphs/digraphs	11
1.4.1 Ferrers digraphs/ bigraphs and Ferrers dimension . . .	12
1.4.2 Characterization of interval digraphs / bigraphs	14
1.4.3 Interior edges	21
1.4.4 Forbidden subgraphs and forbidden substructures. . . .	23
1.4.5 Related topics	25
1.5 A brief outline of the thesis	30
1.5.1 Permutation bigraphs :	30

1.5.2	Interval tournaments	31
1.5.3	Homogeneous interval bigraphs	32
1.5.4	Circular-arc bigraphs and its subclasses	32
2	Permutation Bigraphs	34
2.1	Introduction	34
2.1.1	Associated permutation bigraph	39
2.2	Characterization of Permutation Bigraphs	41
2.3	Examples	49
2.4	Interval Bigraphs and Indifference Bigraphs	52
2.5	Comparability graphs and Permutation bigraphs	57
3	Interval Tournaments	63
3.1	Preliminaries	65
3.2	Characterization	68
4	Homogeneous Interval Bigraphs	79
4.1	Introduction	79
4.2	Preliminaries	83
4.3	Vertex-homogeneous Representation	89
4.4	Edge-homogeneous Representation	103
5	Circular-arc bigraphs	109
5.1	Introduction	109
5.2	Circular-arc bigraphs	116
5.3	Proper circular-arc bigraphs	128
5.4	Unit circular-arc graphs and bigraphs	133
	Conclusion	136
	Bibliography	139

List of Figures

1.1	Forbidden subgraphs for interval graphs	6
1.2	Ferrers digraph	13
1.3	A matrix with a zero-partition	16
1.4	Stair partition	16
1.5	Generalized linear ones property	17
1.6	Forbidden graph of Theorem 1.4.4(6)	18
1.7	Forbidden graphs of Theorem 1.4.4(7)	18
1.8	Monotone consecutive arrangement	19
1.9	Forbidden graphs of Theorem 1.4.5(8) :	21
1.10	Insects	24
1.11	Bugs	24
1.12	Bigraphs of F^0	25
1.13	Bounded bitolerance representation	27
2.1	A permutation bigraph	36
2.2	A permutation bigraph and its associates	41
2.3	The two orderings of a Ferrers bigraph	43
2.4	A bigraph which is the intersection of two Ferrers bigraphs	45
2.5	A permutation bigraph B	46
2.6	Biadjacency matrices of F_1 and F_2	46
3.1	Forbidden tournaments	64
3.2	Complete list of forbidden subdigraphs for interval tournament	65

3.3	The only 4-tournament having two 3-cycles	66
3.4	The bigraphs of 5-tournament having no common vertex of its 3-cycles	67
3.5	The digraphs D_0 and D_2	73
3.6	The digraphs D_0 and D_2 with labelled vertices	74
4.1	P_5	84
4.2	Interval representation of P_5	85
4.3	$P_6(B_5)$	85
4.4	Interval representation of P_6	85
4.5	Forbidden vertex-homogeneous bigraphs	86
4.6	B_6	103
5.1	Stair partitions of (Ferrers) bigraph.	111
5.2	Fundamental stair partition	119
5.3	A fundamental matrix of a 2-clique circular-arc graph C with respect to F	119
5.4	Biadjacency matrix of a circular-arc bigraph and its stair par- tition	121
5.5	Biadjacency matrices by adjoining cliques to its partite sets . .	121
5.6	Supplementary 2-clique circular-arc graph and its fundamental matrix with respect to C_1	122
5.7	Supplementary 2-clique circular-arc graph and its fundamental matrix with respect to C_2	123
5.8	A circular-arc bigraph and its biadjacency matrix	124
5.9	A Ferrers bigraph and its biadjacency matrix	125
5.10	A matrix and its monotone circular arrangement	131
