Contents

CHAPTER – I

1.0.0 INTRODUCTION 1

CHAPTER – II

2.0.0 REVIEW OF LITERATURE 17

2.1.0 HISTORY OF *HIPPOPHAE* L (SEABUCKTHORN) RESEARCH 17

2.1.1 Legends associated with sea buckthorn 18

2.2.0 ANTIOXIDANT PROPERTIES AND CHEMISTRY 18

2.3.0 AGROTECHNIQUES OF SEA BUCKTHORN 20

2.4.0 DISTRIBUTION OF ACTINORHIZAL PLANTS 22

2.5.0 TAXONOMY AND EVOLUTION OF ACTINORHIZAL PLANTS 24

2.6.0 HISTORY OF *FRANKIA* RESEARCH 28

2.7.0 TAXONOMY OF *FRANKIA* 30

2.8.0 TAXONOMY OF THE SPECIES 32

2.9.0 *FRANKIA* –THE MICROSYMBIONT 36

2.9.1 Morphology and anatomy 36

2.10.0 SYMBIOTIC INTERACTION–A PROCESS 37

2.11.0 ISOLATION AND STRUCTURE OF *FRANKIA* IN PURE CULTURE 39

2.11.1 The hyphae 40

2.11.2 The sporangia 40

2.11.3 The vesicle 41

2.12.0 GENETIC DIVERSITY OF *FRANKIA* 42

2.13.0 PROBLEM IDENTIFICATION 43

CHAPTER – III

3.0.0 MATERIALS AND METHODS 45

3.1.0 THE STUDY AREA 45

3.2.0 SURVEY OF STUDY AREA 46

3.3.0 ENVIRONMENTAL STUDIES 47

3.4.0 ROOT NODULE QUANTIFICATION 51

3.5.0 GENDER DIFFERENTIATION 51

3.6.0 GERMPLASM COLLECTION 51

3.7.0 SOIL ANALYSIS 52

3.8.0 AGROTECHNIQUES 53

3.8.1 Seed germination performance 53

3.8.2 Propagation through cuttings 54

3.8.3 Layering 54

3.9.0	ANTIOXIDANT ANALYSIS	55
	3.9.1 Chemicals and reagents	55
	3.9.2 Plant material extraction	55
	3.9.3 Determination of plant extract yield	55
	3.9.4 Determination of total phenolic content	56
	3.9.5 Determination of total flavonoid content	56
	3.9.6 Antioxidant properties of extracts *in vitro*	56
	3.9.6.1 Free radical scavenging activity (DPPH method)	56
	3.9.6.2 Reducing power assay	56
	3.9.6.3 Scavenging of hydrogen peroxide	57
	3.9.7 Statistical analysis	57
3.10.0	ISOLATION OF ENDOPHYTE	57
	3.10.1 Washing	57
	3.10.2 Surface sterilization	57
	3.10.3 Isolation of *Frankia* in liquid culture	58
	3.10.3.1 Technique 1	58
	3.10.3.2 Technique 2	58
	3.10.3.3 Technique 3	59
	3.10.4 Media for isolation	59
3.11.0	POST ISOLATION TASK	59
	3.11.1 Incubation and sub-culture	59
	3.11.2 Maintenance of culture	59
	3.11.3 Decontamination	59
	3.11.4 Nodulation test	60
	3.11.5 Plant infectivity test	60
3.12.0	ISOLATION OF GENOMIC DNA	60
	3.12.1 Isolation of genomic DNA from the root nodules	60
	3.12.2 *Frankia* DNA purification	62
3.13.0	QUANTIFICATION	63
3.14.0	POLYMERASE CHAIN REACTION AMPLIFICATION	63
	3.14.1 Primer	64
	3.14.2 The primer stock	64
	3.14.3 Annealing temperature	65
3.15.0	PCR REAGENTS	65
	3.15.1 *Taq* DNA polymerase and assay buffer	66
	3.15.2 Deoxyribonucleotide triphophate (dNTP) mix	66
3.16.0	DNA DILUTION	66
3.17.0	PCR MIX	66
3.18.0	PROGRAMME FOR PCR AMPLIFICATION	66
3.19.0	AGAROSE GEL ELECTROPHORESIS	67
3.20.0	GEL PHOTOGRAPHY	67
3.21.0	RESTRICTION FRAGMENT LENGTH POLYMORPHISM	67
	3.21.1 PCR-RFLP data analysis	68
3.22.0	NUCLEOTIDE SEQUENCING	68
3.23.0	SEQUENCE BLAST	69
3.24.0	SEQUENCE SUBMISSION TO GENE BANK	69
3.25.0	PHYLOGENETIC ANALYSIS	70

CHAPTER – IV

4.0.0 RESULTS AND DISCUSSIONS 71

4.1.0 SOME SURVEY FACTS 71

4.1.1 Land use and land cover 71

4.1.2 Elevation 75

4.1.3 Aspect 76

4.1.4 Slope 76

4.1.5 Vegetation analysis 78

4.1.6 Soil analysis 82

4.1.7 The plant morphology 83

4.1.7.1 Leaf 85

4.1.7.2 Flower 86

4.1.7.3 Fruits and seeds 86

4.1.7.4 Root 87

4.1.8 Root nodule quantification 88

4.2.0 GROWTH OF HOST PLANT 91

4.2.1 Seed germination 91

4.2.2 Germination performance using active substances 93

4.2.3 Propagation by cuttings 94

4.2.4 Layering 96

4.3.0 ANTIOXIDANT 97

4.3.1 Plant yield 97

4.3.2 Total phenolic and flavonoids content 97

4.3.3 Antioxidant activities 98

4.3.4 Free radical scavenging activity (DPPH method) 98

4.3.5 Reducing power assay 100

4.3.6 H_2O_2 radical scavenging activity 100

4.3.7 Correlation study 100

4.4.0 ISOLATION OF *FRANKIA* 105

4.4.1 Surface sterilization 105

4.4.2 Culture media for isolation 106

4.4.3 Nodulation test 106

4.4.4 *Frankia* under light microscope 106

4.4.5 Plant infectivity test 108

4.5.0 ISOLATION OF DNA OF *FRANKIA* FROM ROOT NODULES 108

4.5.1 *Frankia* DNA purification 109

4.5.2 DNA quantification 109

4.6.0 POLYMERASE CHAIN REACTION 111

4.7.0 PHYLOGENY AND GENETIC DIVERSITY 112

4.8.0 PCR-RFLP DATA ANALYSIS USING POPGENE SOFTWARE 113

CONCLUSION 126
