<b>Topics</b>	<b>Page No.</b>
Abstract	i
Preface	v
Acknowledgments	vii
Table of Contents	ix
List of Tables	xi
List of Figures	xiii
List of Appendices	xix
<hr/>	
<b>Chapter I: Introduction</b>	
1.1 Ligand	1
1.2 Monodentate ligand	3
1.3 Bidentate ligand	5
1.4 Polydentate ligand	6
1.5 Metal complex	8
1.6 Anticancer Activity	14
1.7 Oxidase Activity	16
1.8 Catecholase activity	16
1.9 Phenoxazine synthase	21
1.10 Aims and Objectives	25
1.11 References	27
<hr/>	
<b>Chapter II: Methodology</b>	
2.1 Source and purification of the chemicals used	33
2.2 Chemical reaction Procedure	34
2.3 Ambient temperature reaction	35
2.4 Reflux reaction	36
2.5 Synthesis of Ligand	38
2.6 Synthesis of metal complexes	40
2.7 Crystallization of a metal complex	41
2.8 Organic Ligands used	45
2.9 In Vitro cell cytotoxicity assay	51
2.10 Physico-chemical characterization	52
2.11 Theoretical characterization	59
2.12 References	62
<hr/>	
<b>Chapter III: 3-(1,3-Dioxoisindolin-2-yl)-N, N-dimethylpropan-1-ammonium perchlorate: Synthesis, crystal structure, computational study and in vitro anticancer activity against the human hepatomas cell line (Hep G2)</b>	
3.1 Introduction	67
3.2 Materials and methods	68
3.3 Results and discussion	72
3.4 Conclusion	81
3.5 References	81
3.6 Supporting information	86

---

**Chapter IV: 3,3'-[succinylbis(diazaneyl)]bis(N,N,N trimethylpropan-1-ammonium) perchlorate: Synthesis, characterization, computational studies and in vitro anticancer activity against the human colon carcinoma cell line (HT-29)**

4.1 Introduction	95
4.2 Materials and methods	96
4.3 Results and discussion	100
4.4 Conclusion	111
4.5 References	112
4.6 Supporting information	116

---

**Chapter V: Novel bioinspired dinuclear Cu(II) 'paddle wheel' acetate complex: catalytic and in vitro biological activity studies**

5.1 Introduction	123
5.2 Materials and methods	124
5.3 Results and discussion	126
5.4 Conclusion	140
5.5 References	140
5.6 Supporting information	148

---

**Chapter VI: Functional mimic for catechol oxidase and phenoxazinone synthase: Structural, spectral, electrochemical and catalytic properties of mononuclear copper(II) complex**

6.1 Introduction	175
6.2 Results and discussion	177
6.3 Materials and methods	190
6.4 Conclusion	191
6.5 References	192
6.6 Supporting information	199

---

**Chapter VII: Scope for Future work** 215

Summary of the Thesis	217
Appendix-I	221
Appendix-II	223
Appendix-III	224
Bibliography	225
Index	255

---
