

C O N T E N T S

<u>CHAPTER 1</u>	<u>Page</u>
Introduction	1
1.1 Viscosity of Liquids and Liquid Mixtures	1
1.1.1 Early Theoretical Considerations on Liquid Viscosity	2
1.1.2 The Cell Lattice Theory and Liquid Viscosity	3
1.1.3 Statistical Mechanical Approach to Liquid Viscosity	3
1.1.4 Principle of Corresponding States and Liquid Viscosity	4
1.1.5 The Reaction Rate Theory For Viscous Flow	5
1.1.6 The Significant Structure Theory and Liquid Viscosity	6
1.1.7 Correlative Procedures for Pure Liquids	8
1.1.8 Correlative Procedures for the Viscosity of Liquid Mixtures	10
1.2 Density of Liquids and Liquid Mixtures	26
1.2.1 Density Correlations for Pure Liquids	26
1.2.2 Density Correlations for Liquid Mixtures	28
1.3 Conclusion	30
Nomenclature	31
References	36

<u>CHAPTER 2</u>	<u>Page</u>
Experimental	43
2.1 Materials	43
2.2 Purification of the Liquids Used	44
2.3 Temperature Control	45
2.4 Preparation of Mixed Binary And Ternary Systems	45
2.5 Measurement of Density	45
2.6 Measurement of Viscosity	46
Nomenclature	48
References	49
<u>CHAPTER 3</u>	
Data and Computation	50
3.1 Purity Check for Chemicals Used	50
3.2 Component Concentration in a Mixed Liquid System	50
3.3 Density and Viscosity Data of Pure Components	51
3.4 Density and Viscosity Data for Constituent Binary Liquid Mixtures	51
3.5 Density and Viscosity Data for Ternary Liquid Mixtures ^a	52
Nomenclature	74
References	75

<u>CHAPTER 4</u>	<u>Page</u>
Results and Discussion	76
4.1 Choice of System Properties and Identification of Experimental Region	76
4.2 Selection of System Components of Liquid Binary Mixtures	77
4.3 Selection of System Components of Liquid Ternary Mixtures	78
4.4 Experimental Temperature	79
4.5 Mixture Viscosity Correlation by McAllister Type Equation Based on Three-Body Interactions	80
4.5.1 Correlation of Mixture Kinematic Viscosity of Binary Liquid Systems by Equation (4.19)	85
4.5.2 Variation of Interaction Parameters ν_{12} and ν_{21} of Equation (4.19) with Temperature	85
4.5.3 Correlation of Mixture Kinematic Viscosity of Ternary Liquid System By Equation (4.18)	86
4.5.4 Variation of The Parameter ν_{123} of Equation (4.18) with Temperature	87
4.6 Mixture Viscosity Prediction Based on Significant Liquid Structure Theory of Eyring	114
4.6.1 Evaluation of Solid-Like Volume V_s By Singh - Sinha Method	117
4.6.2 Evaluation of Θ , n , a , E_s , d and r to be used in Equation (4.23)	118
4.6.3 Prediction of Mixture Viscosity by SLS Equation (4.25) for Binary Liquid Systems	120
4.6.4 Prediction of Mixture Viscosity by SLS Equation(4.25) for Ternary Liquid Systems	121

	<u>Page</u>
4.7 Correlation of Excess Viscosity with Mixture Composition	146
4.7.1 Variation of Binary Excess Viscosity with Composition for Binary Liquid Systems	147
4.7.2 Correlation of Viscosity for Binary Liquid Mixtures with Polynomial Type Equation	147
4.7.3 Comparative Correlation ability of Equations Used for Correlating Binary η_m -X-T Data	148
4.7.4 Correlation of Viscosity for Ternary Liquid Mixtures with Polynomial Type Equations	148
4.7.5 Comparative Correlation Ability of Equations Used For Correlating Ternary η_m -X-T Data	151
4.8 Thermodynamics of Viscous Flow	221
4.8.1 Evaluation of the Thermodynamic Quantities of Activation of Viscous Flow for The pure components and their variation with the nature of components	221
4.8.2 Evaluation of The Thermodynamic Quantities of Activation of Viscous Flow for Binary Liquid Systems Studied and their Variations with compositions	224
4.8.3 Evaluation of The Thermodynamic Quantities of Activation of Viscous Flow for Ternary Liquid Systems Studied and their Variations with Composition	226
4.9 Mixture Density Prediction Based on Multifluid Model	260
4.9.1 Multifluid Model for the Densities of Binary Liquid Mixtures	264
4.9.2 Multifluid Model for the Densities of The Ternary Liquid Mixtures	266

	<u>Page</u>
4.9.3 Ternary Mixture Density Calculated by Multifluid Model Equation (4.66) with $K_f(x)$ at Different Temperatures	268
4.10 Variation of Excess Density with Mixture Composition	294
4.10.1 Correlation of Mixture Density-Composition-Temperature Data For Binaries By A Polynomial Type Equation	294
4.10.2 Comparative Correlation of Equations (4.77) And (4.98) For Binary Systems	295
4.10.3 Correlation of Mixture Density-Composition-Temperature Data For Ternaries By Polynomial Type Equations	295
4.10.4 Comparative Correlation Ability of Equations Based on Multifluid Model Equations (4.87), (4.96) And Polynomial Equations (4.99), (4.100) And (4.101) For Mixture Density	297
Nomenclature	350
References	355
 <u>CHAPTER 5</u>
