

Acknowledgement

I express my regards and gratitude towards my supervisor Dr. Bhaskar Chakraborty, Associate Professor in Chemistry, Sikkim Government College (NBBDC), Gangtok who has been an integral part in these four years of research and it was an unique and rewarding experience for me. Throughout the period of research work I have received expert criticism, valuable comment and also his best care. His unique creativity has had a significant impact on my research work, and his passion for research work has in turn provided me with a wealth of opportunities and for which I am highly grateful. I am highly grateful to Dr. M.N Roy, Professor of Chemistry, University of North Bengal for guiding me in these four years with his advices.

I also feel fortunate that I could interact with faculty members of Department of Chemistry, University of North Bengal and Indian Association for the Cultivation of Science, Jadavpur during the course of my PhD career. My heartfelt gratitude goes to Prof. B. Basu and Dr. A.K Nanda, Department of Chemistry, University of North Bengal for their constructive ideas and for providing NMR spectra of some of the important compounds related to my present work. I am also highly grateful Prof. B. C. Ranu and Prof. A. Dey of Indian Association for the Cultivation of Science, Jadavpur for their valuable suggestions relating to the research work. My regards and thanks are also due to Principal, Sikkim Government College (NBBDC), Gangtok and also former principals of our institution viz, Dr. (Mrs.) Lily Alley, Dr. M. P Kharel, Dr. C. B. Sunwar for their ever enthusiastic support, constant co-operation and for providing research facilities. I am equally grateful to the scientist in-charge, SAIF, CDRI, Lucknow for providing IR, NMR, MS and elemental analysis spectral data.

I would like to express my personal appreciation for the assistance rendered by Dr. Manjit Singh Chhetri, Dr. Saurav Kafley, Dr. Prawin Kumar Sharma, Dr. Neelam Rai and Dr. Govinda Prasad Luitel, Department of Chemistry, Sikkim Government College (NBBDC) in this work. I am extremely grateful to Prof. Amalesh Samanta of Jadavpur University, Kolkata for helping me in finding out the biological aspects of the entire work. Without their support and effort my research work would not have been completed. I am also equally grateful to Prof. Duncan L. Browne, Professor of

Chemistry, Cardiff University, Cardiff, UK for his valuable guidance especially to the mechanochemical synthesis.

My sincere gratitude to Shri Tshering Namgyal, Assistant Professor of English, Namchi Government College, Namchi for his valuable support towards editing the thesis. I would also like to express my thanks and regards to Mr. Denlock Lepcha, Mrs. Durga Sharma, Mr. Royal Karthak, Mr. Arun Thapa, staff members of Chemistry Department, Sikkim Government College for their continuous support. I also would like to express my heartfelt gratitude to Mrs. Malini Chakraborty for her continuous encouragement. Finally, I would like to express my deep gratitude for my dear parents. Their affection and love ever encouraged me for the entire research work. Lastly, all the people who rendered valuable support in direct and indirect means in bringing this research work to completion are sincerely acknowledged.

Esmita Chhetri
