

## TABLE OF CONTENTS

	PAGE
INTRODUCTION	1
Profile of <i>Clarias batrachus</i>	21
MATERIALS AND METHODS	24
Animals	24
Macro Study of lymphoid organs	24
Histological preparation	24
Antigens	25
Immunization	25
Cell suspension	25
Ammonium sulphate precipitation of fish serum	26
Isolation of fish immunoglobulin by Sephadex G-200 gel filtration	27
Raising of rabbit antisera against <i>Clarias batrachus</i> immunoglobulin	28
Raising of rabbit anti- <i>Clarias batrachus</i> brain serum	28
Conjugation of goat anti-rabbit IgG with fluorescent dyes	29
Immunofluorescent detection of Ig bearing and brain associated antigen determinants on the surface of fish lymphocytes	29
Complement	30
Plaque forming cell assay (PFC)	31
Preparation of serum samples and antibody titration	31
Delayed type hypersensitivity with 2,4-Dinitrofluorobenzene (DNFB)	32

<i>In vitro</i> mitogen mediated activation of lymphocytes	32
Dose regime of mitogen	33
Viability test	33
Measure of DNA synthesis	33
RESULTS	35
Study of the lymphoid organs	35
Thymus	35
Kidney	37
Spleen	38
Fluorescence microscopy for surface immunoglobulin (Ig) bearing cells and their distribution	38
Fluorescent analysis of lymphocytes having brain associated antigenic determinants	41
Antibody mediated immune response	42
Cell mediated immune response	47
Antigen responsiveness of lymphocytes	48
DISCUSSION	50
SUMMARY	67
APPENDIX (Plates, Figures and Tables)	71
BIBLIOGRAPHY	100
