Acknowledgement .....	i-ii
Abbreviation .....	iii-v
General Introduction .....	1-7
Abstract .....	8-15
<b>CHAPTER-1</b>	
<b>Review of Literature</b>	
Commercial utilisation of oleiferous <i>Brassicas</i> with special emphasis on their medical and nutritive value .....	16-18
Commercial cultivation of oleiferous <i>Brassicas</i> in different countries with special interest in West Bengal, India.....	18-20
Biotechnology in connection with detoxification of rapeseed meal.....	20-21
Distribution of phytosterols in <i>Brassica</i> spp.....	21-23
General structure and nomenclature of glucosinolate in <i>Brassica</i> spp.....	24-26
Glucosinolates available in seeds of <i>Brassica campestris</i> and <i>Brassica juncea</i> . .....	27
Distribution of glusinolate in different plant parts of <i>Brassica</i> spp. ....	28-29
Biosynthesis of glucosinolate.....	29-31
Myrosinase activity on glucosinolate.....	32-34
Biological function of glucosinolate .....	34-35
Methodology used for quantative estimation of glucosinolate in different <i>Brassica</i> spp. ....	35-37
Bio-ecology of mustard aphid .....	38
Cultural control of mustard aphid .....	38-39

Chemical control of mustard aphid.....	40
Aphid resistance in rapeseed-mustard.....	40-41
Economics of aphid control.....	41-42
Ecophysiological observation on seed germination behaviour in <i>Brassica</i> spp. ....	42-43
Eco-physiological investigation on growth and development of <i>Brassica</i> spp.....	43-46
Factors affecting productivity of seed with special emphasis on oil and other chemical contents in <i>Brassica</i> spp. ....	46-48
Allelopathic effect in inhibitor species with special reference to oiliferous <i>Brassicac</i> s.....	49-50

## CHAPTER II

**Survey on utilisation of some Cultivars of *B. campestris* L. and *B. juncea* as field crops in ecologically different region in India, their organoleptic features with special interest on their adaptability and productivity of oil in the plains of Darjeeling condition.**

Introduction .....	51
Materials and Methods .....	52-53
Results and Discussion .....	54-65
Summary .....	66
References .....	158-181

## CHAPTER III

**Comparative study on aphid (*Lipaphis erysimi* kalt) incidence on the same cultivars of *Brassica campestris* L. and *B. juncea* czern grown in different ecological condition of Northern and southern part of West Bengal to select suitable strain of *Brassica*. for Darjeeling condition.**

Introduction.....	67
Materials and Methods .....	68-69
Results and Discussion .....	69-76
Summary .....	77
References .....	158-181

## **CHAPTER IV**

**Isolation, purification and characteristics of phytosterols and glucosinolates from the seeds of *B. campestris* L.cv. B-54 grown in Darjeeling conditions.**

Introduction .....	78
Materials and Methods .....	78-82
Results and Discussion .....	82-96
Summary .....	97
References .....	158-181

## **CHAPTER V**

**A new and rapid colorimetric method for quantitative estimation of glucosinolate in seeds of *Brassica campestris* L.cv. B-54.**

Introduction.....	98-99
Materials and Methods .....	99-100
Results and Discussion .....	100-103
Summary .....	104
References .....	158-181

## **CHAPTER - VI**

**Effect of time of sowing on growth and yield of *Brassica campestris* L. cv. B-54 in the plains of Darjeeling condition.**

Introduction .....	105
Materials and Methods .....	105-106
Results and Discussion .....	106-110
Summary .....	111
References .....	158-181

## **CHAPTER - VII**

**Effect of Irrigation and nitrogen on growth and yield of *Brassica campestris* L. cv. B-54. in the plains of Darjeeling condition.**

Introduction .....	112
Materials and Methods .....	113-115
Results and Discusson .....	115-129
Summary .....	130
Refrences .....	158-181

## **CHAPTER - VIII**

**Invigoration of nonviable seeds of *B. campestris* L.cv.B-54 due to treatment with vitamins for their commercial utilisation in the plains of Darjeeling district, West Bengal.**

Introduction .....	131
Materials and Methods .....	132-133
Results and Discussion .....	133-145
Summary .....	146
References .....	158-181

## **CHAPTER - IX**

**Allelopathic effect of seeds and crop residue of *Brassica campestris* L. cv. B-54. with special emphasis on isolation and identification of chemical inhibitor from crop residue and seeds of the cultivar.**

Introduction .....	147-148
Materials and Methods .....	148-149
Results and Discussion .....	149-155
Summary .....	156-157
References .....	158-181
