

C O N T E N T S

	Page
ACKNOWLEDGEMENT	(i)
PREFACE	(iii)
CHAPTER 1 OBJECTIVE AND INTRODUCTION TO THE THEORY	
A. Introduction	1
B. The Del Re approximation	5
C. Evaluation of the Del Re parameters for tin-carbon, tin-chlorine and tin-hydrogen bonds	9
References	13
CHAPTER 2 HEATS OF ATOMISATION OF ORGANOTIN COMPOUNDS	
Introduction	16
Procedure	
A. Calculation of σ -bond energies	17
B. Calculation of the π -bond energies	19
Results and discussion	28
Summary	31
References	32
CHAPTER 3 DIPOLE MOMENTS OF ORGANOTIN COMPOUNDS AND VARIATION IN THE TIN-CHLORINE AND TIN-CARBON BOND POLARITY	
Introduction	34

	Page
Procedure	
A. Calculation of the σ -moments	35
B. Calculation of the π -moments	37
Result	39
Summary	48
References	49
CHAPTER 4 VARIATIONS IN TIN-CHLORINE, TIN-CARBON AND TIN-HYDROGEN STRETCHING FREQUENCIES AND TIN-CHLORINE BOND DISTANCE IN ORGANOTIN COMPOUNDS	
Introduction	51
Results and discussions	
A. Variation in the tin-chlorine bond distance in methyltin halides	52
B. Variation in tin-chlorine, tin-carbon and tin-hydrogen stretching frequencies	56
Summary	59
References	61
CHAPTER 5 NMR SPECTRA OF ORGANOTIN COMPOUNDS	
Introduction	62
Results and discussions	
A. Proton chemical shifts of organotin compounds	64
B. ^{13}C -H spin-spin coupling constants in organotin compounds	69
C. The tin-proton spin-spin coupling constants	74
Summary	81
References	83

	Page
CHAPTER 6 MOSSBAUER SPECTRA OF ORGANOTIN COMPOUNDS	
Introduction	85
A. Mossbauer isomer shifts in organotin compounds	
Method	88
Result and discussion	94
B. Quadrupole splittings in organotin compounds	
Method	99
Result and discussion	104
Summary	111
References	113
CHAPTER 7 THE CHEMICAL REACTIVITY OF ORGANOTIN COMPOUNDS	
Introduction	115
Section A. Reactivity of saturated organotin compounds	
Method	120
Results and discussion	130
Section B. Tin-aryl and tin-vinyl bond cleavage in trialkylaryltin and trialkylvinyltin compounds	
Method	139
Results and discussion	140
Section C. Bond polarisability index and reactivity of organotin compounds	
Method	147

Results and discussion	
(i) Reactivity of organotin compounds	151
(ii) Application to other metalalkyls	154
(iii) Application to other types of reactions	156
Summary	159
References	162
APPENDIX-I Hybrid orbitals for Y_2SnX_2 type compounds belonging to O_{2v} point group.	1a
APPENDIX-II Calculated values of the Coulomb integrals (δ_{μ}) bond polarities ($Q_{\mu\nu}$) and σ -charge distributions in organotin compounds	4a
