

# C O N T E N T S

	<u>P a g e</u>
 <u>CHAPTER - I</u>	
INTRODUCTION :	
(A) Review of the Previous Works I	... 1
(B) Review of the Previous Works II	... 41
(C) Scope and Object of the Present Work	... 71
(D) Topic-wise Summary of the Present Investigations	... 76
 <u>CHAPTER - II</u>	
THE EXPERIMENTAL TECHNIQUES ..	... 92
 <u>CHAPTER - III</u>	
AZIMUTHAL RADIO FREQUENCY CONDUCTIVITY MEASUREMENT IN AN ARC PLASMA BY STUDYING THE EDDY CURRENT EFFECT	... 119
 <u>CHAPTER - IV</u>	
RADIAL DISTRIBUTION FUNCTION FOR THE AZIMUTHAL CONDUCTIVITY OF AN ARC PLASMA	... 132
 <u>CHAPTER - V</u>	
ANALYSIS OF THE PREVIOUS COIL PROBE EXPERIMENT	... 156

CHAPTER - VI

HEAT FLOW PROCESSES IN THE POSITIVE COLUMN OF A LOW PRESSURE MERCURY ARC	...	184
-----------------------------------------------------------------------------	-----	-----

CHAPTER - VII

A SINGLE FLUID MODEL APPROACH TO OBTAIN THE ION-ACOUSTIC WAVE DISPERSION AND DAMPING IN A WEAKLY IONIZED GAS	...	217
--------------------------------------------------------------------------------------------------------------------	-----	-----

CHAPTER - VIII

ATTENUATION OF ACOUSTIC WAVES THROUGH REFLECTIONS AT THE PLASMA NEUTRAL GAS INTERFACES : WEAKLY IONIZED CASE	...	239
--------------------------------------------------------------------------------------------------------------------	-----	-----

CHAPTER - IX

GENERATION OF ION-ACOUSTIC WAVE IN A GLOW DISCHARGE PLASMA BY SONIC TRANSDUCER : A NEW NON-IMMERSIVE SONIC PROBE DIAGNOSTIC METHOD	...	254
---------------------------------------------------------------------------------------------------------------------------------------------	-----	-----
