| Plate 1 - 19 | | 71 to 89 |
| Figure | Title | |
| 1 | Scatter diagram and linear regression plot showing relation of weight of thymus and body weight of <i>Clarias batrachus</i> . | 90 |
| 2 | Changes in the total number of thymic cells in the adult fish in different months. | 91 |
| 3 | Scatter diagram and linear regression plot showing relation of weight of spleen and body weight of <i>C. batrachus</i> . | 92 |
| 4 | Diagrammatic representation of kidney of <i>C. batrachus</i> | 93 |
| 5 | Sephadex G.200 elution profile of <i>C. batrachus</i> immunoglobulin. | 94 |
| 6 | Percentage of lymphocytes bearing HMW sIg, LMW sIg and having brain associated antigen in different lymphoid organs and peripheral blood (PBL) as determined by indirect immunofluorescence. | 95 |
| 7 | Haemolytic activities of <i>C. batrachus</i> serum against erythrocytes of various vertebrate species. | 96 |
| 8 | Number of plaque forming cells in different lymphoid organs and peripheral blood lymphocytes (PBL) on the 5th day of immunization with 0.2 ml of 25% SRBC. | 97 |
| 9 | Kinetics of the PFC response with three different doses of 25% SRBC. | 98 |
| 10 | Kinetics of plaque forming cells in the head kidney and spleen with primary and secondary challenge of 0.2 ml. of 25% SRBC on day 0 and 20 respectively as indicated by arrows. | 99 |

| | | |
|----|---|-----|
| 11 | Comparison of responses at peak, after single challenge of 0.2 ml, after second challenge of 0.2 ml after 20 days and after second challenge of 0.1 ml after 20 days. | 100 |
| 12 | Kinetics of haemagglutination titre of serum from the fishes immunized with three different doses of SRBC. | 101 |
| 13 | Kinetics of haemagglutination titre of serum with primary and secondary challenge of 0.2 ml of 25% SRBC on day 0 and 30 respectively. | 102 |
| 14 | Degree of erythema on the skin at different hours after resensitization on the 7th day from the initial sensitization with 2,4 DNFB (2,4 Dinitrofluorobenzene). | 103 |
| 15 | Kinetics of ³ HTdR incorporation in ConA stimulated lymphocytes of head kidney at different hours using varying doses. | 104 |
| 16 | Kinetics of ³ HTdR incorporation in ConA stimulated lymphocytes of spleen at different hours using varying doses. | 105 |
| 17 | Kinetics of ³ HTdR incorporation in ConA stimulated lymphocytes of peripheral blood at different hours using varying doses. | 106 |
| 18 | Kinetics of ³ HTdR incorporation in LPS stimulated lymphocytes of head kidney at different hours using varying doses. | 107 |
| 19 | Kinetics of ³ HTdR incorporation in LPS stimulated lymphocytes of spleen at different hours using varying doses. | 108 |
| 20 | Kinetics of ³ HTdR incorporation in LPS stimulated lymphocytes of peripheral blood at different hours using varying doses. | 109 |
