

Preface

This thesis is based on some results of the work done during the last five years under the supervision of my teacher Professor S. Mukherjee, Head of the Department of Physics, North Bengal University. I wish to express my gratitude to him for his guidance and encouragement.

It has been a great pleasure for me to work with Dr. D. P. Datta to whom I am greatly indebted. I also wish to record my gratitude to all my teachers for their help and encouragement. I am thankful to the University Grants Commission, New Delhi for the award of a NET fellowship and to the Indian Space Research Organization for financial support at the beginning of this work.

I am also thankful to Mr. A. Guha, Raiganj University College, Mr. A. K. Roy, CFRI (Dhanbad), Mr. M. L. Rakshit, Alipurduar College, Mrs. S. Ghosh (Mondal) and my other colleagues for their encouragement and help. The staff members of the University Library and Physics Department, NBU have helped me in many ways in the preparation of this thesis. I am thankful to all of them. Finally, I would like to record my indebtedness to Sri S. R. Chatterjee, my teacher in the boyhood days who inspired me to study Physics.
