

Contents

Chapter 1	<i>Theoretical approach and Review work</i>	(1-33)
	General & 1, 3-dipole	1-2
	HMO calculation	3-4
	Reactivity profile of 1, 3-dipoles	6
	Nomenclature	7-8
	Synthesis of nitrones	9-12
	1,3-dipolar cycloaddition reaction	13-16
	Stereoselectivity in nitrono cycloaddition	16-17
	Current literature survey	18-30
	Reference	31-33
Chapter 2	<i>Experimental section</i>	(34-79)
I	Preparation of chlorohydrin	34
II	Preparation of <i>N</i> -phenyl- α -chloronitrono 1	35
III	Cycloaddition reaction with alkenes	35
	Synthesis of	
	1. <i>N</i> - phenyl maleimide cycloadduct	36
	2. <i>N</i> -methyl maleimide cycloadduct	38
	3. <i>N</i> -cyclohexyl maleimide cycloadduct	39-40
	4. Ethyl acrylate cycloadduct cycloadduct	40
	5. Methyl vinyl ketone cycloadduct	41
	6. Styrene cycloadduct	42
	7. Cyclohexene cycloadduct	43
	8. Acenaphthylene cycloadduct	44
	9. <i>p</i> -OMe- <i>N</i> -phenyl maleimide cycloadduct	45
	10. Acrylo nitrile cycloadduct	46-47
	11. Trichloroethylene cycloadduct	47-48
	12. Tetrachloro ethylene cycloadduct	48
	13. Methyl vinyl ether cycloadduct	49

IV	Reaction of nitrone 1 with alkynes	49
	Synthesis of	
	1. Ethyl propiolate cycloadduct	50-51
	2. Dimethyl acetylene dicarboxylate cycloadduct	51-52
	3. Phenyl methyl propiolate cycloadduct	52-53
	4. Acetylene dicarboxylic acid cycloadduct	53-54
V	Synthesis of chlorohydrine from dihydrofuran.	54
VI.	Synthesis of <i>N</i> -phenyl- α -chloro nitrone 2 from dihydrofuran.	55
VII	Cycloaddition reaction with nitrone 2	56
	Synthesis of	
	1. <i>N</i> -phenyl maleimide cycloadduct	56
	2. <i>N</i> -methyl maleimide cycloadduct	57-58
	3. Styrene cycloadduct	58-59
	4. Phenyl methyl propiolate cycloadduct	60
VIII	Cycloaddition reaction of nitrone 1 in aqueous phase	60
	Synthesis of	
	1. <i>N</i> -methyl maleimide cycloadduct	61-62
	2. <i>N</i> -phenyl maleimide cycloadduct	62-63
	3. <i>N</i> -cyclohexyl maleimide cycloadduct	63-64
	4. Ethyl acrylate cycloadduct	65
	5 Methyl vinyl ketone cycloadduct	65-66
	6 <i>P</i> - methoxy <i>N</i> - phenyl maleimide cycloadduct	66
	7 Acenaphthylene cycloadduct	68
	8 Cyclohexene cycloadduct	69
IX	Synthesis of <i>N</i> -phenyl- α -chloronitrene 3 from chloral	70
X.	1,3-dipolar cycloaddition reaction of nitrene 3	71

	Synthesis of	
	1. <i>N</i> -phenyl maleimide cycloadduct	71
	2. <i>N</i> -cyclohexyl maleimide cycloadduct	72
	3. Styrene cycloadduct	72
	4. Acetylene dicarboxylic acid cycloadduct	73

XI	Synthesis of aldehyde from alkyl halide using α -chloro nitron as oxidizing agent.	74
----	---	----

XII	General procedure for cycloaddition (for regioselective spiro cycloadducts).	75
-----	--	----

	Reference	79
--	-----------	----

Chapter III *Results and Discussion* (80-116)

I.	Synthesis of <i>N</i> -phenyl- α -chloro nitron 1 from Pyran	81
----	--	----

II	Synthesis of <i>N</i> -phenyl- α -chloro nitron 2 from Furan	82
----	--	----

III	Synthesis of <i>N</i> -phenyl- α -chloro nitron 3 from chloral	82
-----	--	----

IV	Interpretation of the mass spectra	93-104
----	------------------------------------	--------

V	Interpretation of ^1H NMR spectra	105-112
---	--	---------

VI	Interpretation of ^{13}C NMR Spectra	112
----	---	-----

VII	Interpretation of other spectra	113-114
-----	---------------------------------	---------

	Reference	115-116
--	-----------	---------

Chapter IV *Scope and objectives* 117-123

	Antibacterial screening	120-121
--	-------------------------	---------

	Reference	122-123
--	-----------	---------
