CHAPTER- I	
1. INTRODUCTION	1 - 4
CHAPTER- II	
2. REVIEW OF LITERATURE	5 - 23
2.1 Phosphorus content in soil	5 - 12
2.1.1 Total P	5
2.1.2 Forms of Phosphorus in soil	5
2.1.2.1 Inorganic Phosphorus fractions	6 - 12
2.2 Available soil Phosphorus	13 - 23
2.2.1 Concept of available Phosphorus	13 - 14
2.2.2 Existing rapid chemical methods of determining available Phosphorus	14 - 17
2.2.3 Quantification of contribution of various inorganic P-fractions towards available P	18 - 19
2.2.4 Crop preference for different P fractions	20
2.2.5 Correlation of different methods of determining available phosphorus with crop response	20 - 23
2.3 Adsorption desorption behaviour of Phosphorus	24 - 43
2.3.1 Phosphate sorption	24 - 40
2.3.1.1 Concept of P-fixation	24 - 25
2.3.1.2 Mechanism of fixation of P in acid soil	25 - 26
2.3.1.2.1 Precipitation of phosphate from soil solution	25
2.3.1.2.2 Interaction with hydrated sesquioxides	25

	Page No.	
2.3.1.2.3	Interaction with silicate clay minerals	26
2.3.1.3	Phosphate sorption characteristics of the soil	26
2.3.1.4	Adsorption Isotherms	26 – 30
2.3.1.5	Some comparative studies on Phosphate adsorption isotherms	30 – 31
2.3.1.6	Factors affecting phosphate adsorption	32 – 38
2.3.1.6.1	Iron and aluminium oxides and hydroxides.	32 – 33
2.3.1.6.2	Organic matter	33 – 35
2.3.1.6.3	Clay	35 – 37
2.3.1.6.4	pH and supporting electrolyte concentration	37 – 38
2.3.1.7	Solution P concentration	38 – 39
2.3.1.8	Phosphate buffering capacity	39 – 40
2.3.2	Phosphate desorption	40 – 43
 CHAPTER- III		
3. MATERIALS AND METHODS		44 – 53
3.1	A brief physiographic information on study area (<i>Terai</i> Agroclimatic zone)	44 – 45
3.1.1	Teesta alluvium	44
3.1.2	<i>Terai</i> soils	45
3.1.3	Brown forest soils	45
3.2	Land use patterns of <i>terai</i> zone of West Bengal	45
3.3	Materials used and their analysis	46 – 52
3.3.1	Soil samples	46 – 52
3.3.2	Plant samples	52

	Page No.
3.4 Statistical analysis	52 – 53
 CHAPTER- IV	
4. RESULTS AND DISCUSSION	54 – 109
4.1 Distribution of soil phosphorus in organic and inorganic fractions	58 – 70
4.1.1 Total P	58
4.1.2 Organic P	58 – 59
4.1.3 Total inorganic P	59 – 61
4.1.3.1 Forms of inorganic P	61 – 63
4.1.4 Relation between forms of inorganic P and soil properties	64
4.1.5 Contribution of P forms towards total P	64
4.1.6 Soil P forms and plant parameters	67 – 70
4.2 Selection of the most suitable available P index	71 – 83
4.2.1 Available soil P estimates	71 – 75
4.2.2 Interrelationship among soil test methods	75
4.2.3 Relationship between soil test methods and inorganic P fractions	75 – 76
4.2.4 Prediction of available soil P from soil P forms	76 – 78
4.2.5 Indices of P availability and soil properties	78
4.2.6 Available soil P versus plant parameters	78 – 81
4.2.7 Prediction of plant available P from available soil P indices/soil P forms	81 – 83
4.3 Adsorption – desorption behaviour of phosphorus	84 – 109

	Page No.
4.3.1 P sorption	84 – 100
4.3.1.1 Amount of P sorbed by soils	84 – 86
4.3.1.2 Phosphorus adsorption isotherms	86 – 88
4.3.1.3 P sorption parameters	88 – 93
4.3.1.2 Relationship between sorption parameters and soil properties	93 – 95
4.3.1.5 Standard phosphorus requirement	95 – 96
4.3.1.6 Supply parameter (SP) of phosphorus	96 – 100
4.3.2 Desorption of phosphorus	100 – 109
4.3.2.1 First desorption	100 – 102
4.3.2.2 Second desorption	102 – 103
4.3.2.3 Cumulative release of phosphorus	104 – 108
4.3.2.4 Hysteresis effect of phosphorus in sorption - desorption process	109
CHAPTER- V	
5. SUMMARY AND CONCLUSION	111 – 116
CHAPTER- VI	
6. BIBLIOGRAPHY	117 – 141
CHAPTER- VII	
7. APPENDIX	i – vii
7.1. Paper accepted for publication from the present investigation	i - vii
