CHAPTER I

Object and Application of the Research Work

1.1. Scope and Objective of the Research Work	1-4
1.2. Importance and Scope of Physico-Chemical Parameters	4-6
1.3. Choice and Importance of Solvents and Solutes used	6-12
1.4. Method of Investigations	12-13
1.5. Summary of the Works done	13-18
References	19-22

CHAPTER II

General Introduction

2.1. Importance of Solution Chemistry	23-24
2.2. Ion-Solvent Interaction	24-27
2.3. Ion-Ion Interaction	27-28
2.4. Theory of Mixed Solvents	28-30
2.5. Density	30-36
2.6. Viscosity	36-62
2.7. Ultrasonic Speed	62-65
2.8. Conductance	65-85
2.9. Solvation Model-Some Recent Trends	85-87
2.10. Conductance-Some Recent Trends	87-88
2.11. Refractive Index	88-89
References	90-108

CONTENTS (Continued)

Topic	Page No.
<hr/> CHAPTER III <hr/>	
Experimental Section	
3.1. Source and Purification of the Chemicals used	109-113
3.2. Experimental Methods	114-123
References	124-126

CHAPTER IV

Ion- Pair and Triple- Ion Formation by Some Tetraalkylammonium Iodides in Binary Mixtures of 1,4-Dioxane + Tetrahydrofuran*.

4.1. Introduction	127
4.2. Experimental Section	128-129
4.3. Results and Discussion	129-131
4.4. Conclusion	131-132
References	133-134
Tables	135-138
Figures	139-141

**Published in Journal of Chemical & Engineering Data, 53 (2008) 141*

 ACS Publications
High quality. High impact.

CHAPTER V

Viscous Synergy and Antagonism, Excess Molar Volume, Isoentropic Compressibility and Excess Molar Refraction of Ternary Mixtures Containing Tetrahydrofuran, Methanol and Six Membered Cyclic Compounds at 298.15K*.

5.1. Introduction	142
5.2. Experimental Section	143-144
5.3. Results and Discussion	144-149
5.4. Conclusion	150
References	151-153

CONTENTS (Continued)

Tables	154-161
Figures	162-165
<i>*Accepted for publication in Physics and Chemistry of Liquids</i>	

Taylor & Francis
Taylor & Francis Group

CHAPTER VI

Ion –Solvent and Ion-Ion Interactions of Sodium Molybdate and Sodium Tungstate in mixtures of Ethane- 1, 2 diol and Water at 298.15, 308.15 and 318.15K*.

6.1. Introduction	166-167
6.2. Experimental Section	167-168
6.3. Results and Discussion	168-173
6.4. Conclusion	173-174
References	175-176
Tables	177-187
Figures	188-190

**Published in Journal of Molecular Liquids, 144 (2009) 149.*

CHAPTER VII

Ion- Pair and Triple- Ion Formation by Some Tetraalkylammonium Iodides in Binary mixtures of Carbontetrachloride + Nitrobenzene*.

7.1. Introduction	191
7.2. Experimental Section	192-193
7.3. Results and Discussion	193-200
7.4. Conclusion	200
References	201-203

CONTENTS (Continued)

Topic	Page No.
Tables	204-211
Figures	212-213

* *Published in Journal of Chemical & Engineering Data*, 54 (2009) 2429.

CHAPTER VIII

Ion-Solvent and Ion-Ion Interactions of Phosphomolybdic Acid in Aqueous Solution of Catechol at 298.15, 308.15 and 318.15K *.

8.1. Introduction	214-215
8.2. Experimental Section	215-216
8.3. Results and Discussion	216-223
8.4. Conclusion	223
References	224-225
Tables	226-234
Figures	235

* *Published in Russian Journal of Physical Chemistry A*, 83 (2009) 1.

CHAPTER IX

Investigation on Solvent-Solvent Interactions in Binary Mixtures of Iso amyl Alcohol with Some Alkoxyethanols*.

9.1. Introduction	236-237
9.2. Experimental Section	237-239
9.3. Results and Discussion	239-244
9.4. Conclusion	244
References	245-246
Tables	247-253
Figures	254-259

* *Communicated in International Journal of Thermophysics*

CONTENTS (Continued)

Topic **Page No.**

CHAPTER X

Studies on solution properties of ternary mixture of Acetophenone + Amyl alcohol + Dichloromethane and its Corresponding Binaries at 298.15 K*.

10.1. Introduction	260-261
10.2. Experimental Section	261-262
10.3. Results and Discussion	262-268
10.4. Conclusion	269
References	270-271
Tables	272-279
Figures	280-282

* *Communicated in Monatshefte fur Chemie*

CHAPTER XI

Study on Ion-Solvent Interactions of Alkali Metal Salts in Pure Methanol and its Binary Mixtures with Ethane 1, 2-Diol by a Conductometric Technique*.

11.1. Introduction	283
11.2. Experimental Section	283-285
11.3. Results and Discussion	285-288
11.4. Conclusion	288
References	289-290
Tables	291-302

**Published in Journal of Fluid Phase Equilibria, 282 (2009) 51.*

CHAPTER XII

Concluding Remarks	303-306
