| <b>ACKNOWLEDGEMENT</b> .....               | i           |
| <b>PREFACE</b> .....                       | iii         |
| <b>LIST OF TABLES</b> .....                | xiii        |
| <b>LIST OF FIGURES</b> .....               | xvi         |
| <b>LIST OF APPENDICES</b> .....            | xviii       |
| <br>                                       |             |
| <b>INTRODUCTION</b> .....                  | 1           |
| Historical review .....                    | 2           |
| Study area .....                           | 5           |
| Purpose and scope of the study .....       | 6           |
| Previous work .....                        | 7           |
| Objectives .....                           | 7           |
| Methodology .....                          | 9           |
| Limitations of the study .....             | 10          |
| Data collection and compilation .....      | 10          |
| Design of the thesis .....                 | 11          |
| <br>                                       |             |
| <i>CHAPTER – I</i>                         |             |
| <b>BACKGOROUND OF THE STUDY AREA</b> ..... | 12          |
| Introduction .....                         | 12          |
| 1.1 Physiography .....                     | 12          |
| 1.2 Drainage .....                         | 15          |
| 1.3 Climate .....                          | 17          |
| 1.4 Soils .....                            | 23          |
| 1.5 Vegetation .....                       | 24          |
| 1.6 Land resources .....                   | 24          |

1.7 Population and culture ..... 28  
1.8 Natural resources and industries ..... 30  
Conclusion ..... 31

*CHAPTER – II*

**GEOLOGICAL SETTING OF THE STUDY AREA ..... 32**  
Introduction ..... 32  
2.1 Structures and tectonics ..... 34  
2.2 Regional stratigraphy ..... 36  
2.3 Description of geological succession ..... 37  
2.4 Sub-surface geology ..... 43  
Conclusion ..... 45

*CHAPTER – III*

**HYDROLOGICAL NATURE AND THEIR RELATION WITH DRAINAGE  
VARIABLES ..... 47**  
Introduction ..... 47  
3.1 Concepts of hydrologic cycle ..... 47  
3.2 Precipitation ..... 49  
3.3 Precipitation analysing procedures ..... 50  
3.4 Surface and sub-surface runoff cycle ..... 61  
3.5 Catchment area and their characteristics ..... 63  
3.6 Hydrologic attributes of relief and slope ..... 64  
3.7 Drainage features and their variables ..... 66  
Conclusion ..... 70

*CHAPTER – IV*

**PROPERTIES OF AQUIFER MATERIALS ..... 72**  
Introduction ..... 72  
4.1 Type of aquifer properties ..... 73

4.2 Grain size distribution ..... 74

4.3 Porosity ..... 77

4.4 Specific yield and specific retention ..... 80

4.5 Permeability ..... 85

4.6 Moisture content of soil ..... 89

4.7 Storage capacity ..... 91

Conclusion ..... 92

*CHAPTER – V*

**WATER TABLE AND ITS FLUCTUATIONS ..... 93**

Introduction ..... 93

5.1 Locations and measurements of the study wells ..... 94

5.2 Depth of water table ..... 94

5.3 Forms and gradient of water table ..... 96

5.4 Fluctuation of water table ..... 98

Conclusion ..... 111

*CHAPTER – VI*

**GROUNDWATER CONDITIONS ..... 113**

Introduction ..... 113

6.1 Groundwater movement ..... 114

6.2 Location of water yielding strata ..... 116

6.3 Sources and replenishment of groundwater ..... 117

6.4 Computation on groundwater recharge ..... 118

6.5 Computation on groundwater discharge ..... 127

6.6 Groundwater balance study ..... 132

6.7 Groundwater balance analysis ..... 133

6.8 Safe yield of the groundwater reservoir ..... 136

Conclusion ..... 137

**CHAPTER – VII**

**WATER QUALITY AND ITS GEOCHEMICAL ASSESSMENT** ..... 139

Introduction ..... 139

7.1 Sampling method ..... 140

7.2 Analysis and measures of water quality ..... 140

7.3 Chemical analysis ..... 140

7.4 Chemical quality of surface water..... 141

7.5 Chemical quality of sub-surface water..... 142

7.6 Reporting of chemical analysis ..... 142

7.7 Dissolved substances..... 145

7.8 Physical analysis ..... 152

7.9 Bacterial analysis ..... 153

7.10 Water quality criteria in relation to its uses ..... 153

7.11 Graphical representation of geochemical data ..... 159

7.12 Changes in quality of groundwater ..... 161

7.13 Factors increasing groundwater pollution..... 162

7.14 Deterioration of groundwater quality..... 163

7.15 Detection and controlling of water pollution ..... 164

Conclusion ..... 165

**CHAPTER – VIII**

**UTILIZATION OF GROUNDWATER AND ITS RELATED PROBLEMS**..... 167

Introduction ..... 167

8.1 Water uses and requirement for irrigation ..... 168

8.2 Irrigated fields under different processes..... 168

8.3 Crop-wise irrigated land..... 173

8.4 Groundwater utilization and requirements..... 174

8.5 Total groundwater utilization and requirements ..... 186

8.6. Problems related to the groundwater utilization ..... 186

Conclusion ..... 193

*CHAPTER – IX*

**CONSERVATION, MANAGEMENT AND PLANNING FOR GROUNDWATER DEVELOPMENT** ..... 195

Introduction ..... 195

9.1 Conservation and management of water resources ..... 195

9.2 Conjunctive use of surface and groundwater resources ..... 202

9.3 Water quality management ..... 203

9.4 Legal dimension of groundwater resources ..... 206

9.5 Planned development of groundwater resources ..... 210

9.6 Projection of groundwater resources in 2011 AD ..... 215

Conclusion ..... 222

*CHAPTER – X*

**SUMMARY AND CONCLUSION** ..... 224

**BIBLIOGRAPHY** ..... 235

**APPENDICES** ..... 248
