

C O N T E N T S

PART - I

	Page
<u>CHAPTER - I</u>	
INTRODUCTION AND REVIEW OF PREVIOUS WORKS ON OXIDATIVE TRANSFORMATION BY SeO_2 , H_2O_2 AND A COMBINATION OF SeO_2 AND H_2O_2	1-38
Introduction ..	1
Selective oxidations with SeO_2	2
Selective oxidations with H_2O_2	21
Reactions involving H_2O_2 and SeO_2	28
<u>CHAPTER - II</u>	
OXIDATION OF LUPANONE, FRIEDELIN AND TARAXERONE BY H_2O_2 IN PRESENCE OF SeO_2	39-140
Introduction and review of some works on bis demethylation	39
Oxidation of Lupanone ..	52
Oxidation of Friedelin ..	71
Oxidation of Taraxerone ..	87
Proposed mechanism of the reactions	107
Experimental details ..	116
<u>CHAPTER - III</u>	
REACTION OF N-BROMO SUCCLINIMIDE WITH LUPENYL ACETATE ..	141-189

	Page
Introduction and a short review of some reactions of N-bromosuccinimide	141
Studies on the action of NBS on Lupenyl acetate, results and discussion	159
Proposed mechanism ..	177
Experimental details ..	181

CHAPTER - IV

AUTOXIDATION IN RING A IN FRIEDELIN	191-235
Introduction and a short review on autoxidation and isomerisation in ring A of triterpenoids ..	191
Autoxidation of Friedelin, results and discussion ..	209
Proposed mechanism of the reaction	223
Experimental details ..	228

PART - II

CHAPTER - I

MORPHOLOGICAL FEATURES AND REVIEW OF SOME WORKS ON THE PLANTS OF FLACOURTIACEAE FAMILY	236-242
Morphological features of plants of Flacourtiaceae family	236
Review of works on the plants of Flacourtiaceae family ..	239

CHAPTER - II

INVESTIGATION OF THE PLANT F. JANGOMAS	243-264
Extraction of neutral and acid parts of F. jangomas ..	243

	Page
Isolation and identification of the compounds ..	244
Experimental details ..	256
 <u>CHAPTER - III</u>	
INVESTIGATION OF THE PLANT C. KURZII	265-275
Extraction of neutral and acid parts of the plant C. kurzii	265
Isolation and identification of the compounds ..	266
Experimental details ..	272
 <u>CHAPTER - IV</u>	
INVESTIGATION OF THE PLANT C. GRAVEOLENS	276-283
Extraction of neutral and acid parts of the plant C. graveolens	276
Isolation and identification of the compounds ..	277
Experimental details ..	281
