

(IV)
C O N T E N T S

ACKNOWLEDGEMENT	(I)
FOREWARD	(II)
CONTENTS	(IV)

Chapter I

A short review of organotin chemistry

IA.	Introduction	1
IB.	Bonding in organotin compounds	2
IC.	Catenation properties of Sn in organotin compounds	7
ID.	Organotin complexes	8
	BIBLIOGRAPHY	18

Chapter II

Cleavage of tin - carbon bonds

IIA.	Introduction	26
IIB.	Electrophilic substitution at a saturated carbon atom	29
IIC.	Symmetrical Vinylic, acetylenic and aryl derivatives	36
IID.	Unsymmetrical Organotin Compounds	37
II E.	Unsymmetrical Vinylic and acetylenic derivatives	44
IIF.	Unsymmetrical aromatic derivatives	47
	BIBLIOGRAPHY	55

Chapter III

Reactions of organotin compounds with 1-nitroso-2-naphthol, potassium 1-nitroso-2-naphthoxide, diacetyl mono oxime, - benzil mono oxime and benzoin oxime

(V)

III A. Introduction	64
III B. Organotin hydroxylamine and oxime derivatives	65
III C. Organotin derivatives of N-benzoyl hydroxylamines	68
III D. Structural feature	69
III E. Objective and scope of the present work	74
III F. Results and discussion	77
BIBLIOGRAPHY	156

Chapter IV

On preparation of organotin carboxylates by the
reaction of organotin hydroxides with esters

IVA. Introduction	162
IVB. Results and discussion	166
IVC. Experimental	169
BIBLIOGRAPHY	177
