

<i>Contents</i>	<i>Page no.</i>
➤ List of abbreviation used	3
➤ List of Chemical pesticides mentioned in the thesis	5
➤ Introduction	6
➤ Objectives and scope of study	14
➤ Review of literature	16.
• Origin, taxonomic character and distribution of <i>Helopeltis</i> spp	17
• Pesticide consumption in tea in India and the Dooars.	19
• Assessment of crop loss and damage potential of <i>H.theivora</i> in tea	20
• Life cycle and oviposition pattern of tea mosquito bug, <i>H. theivora</i> on tea	21
• Mass rearing of <i>H. theivora</i>	23
• Seasonal abundance of <i>H. theivora</i> in tea ecosystem	23
• Abiotic factors influencing <i>H. theivora</i> population	24
• Alternate hosts of <i>H. theivora</i>	25
• Feeding behaviour and nature of damage of <i>H. theivora</i>	26
• Morphological observation of <i>H. theivora</i>	27
• Plant based insecticide against <i>Helopeltis theivora</i> in tea	28
• Use of synthetic chemical insecticides in control of <i>H. theivora</i>	29
• Relative toxicity of insecticides used in tea against <i>H. theivora</i>	31
• Management strategies of <i>H. theivora</i>	32
➤ Materials and methods	33
• Occurrence of <i>H. theivora</i> and insecticide used pattern in the Dooars tea Plantation.	34
• Seasonal abundance and influence of abiotic factors	34
• Morphological variation in <i>H. theivora</i>	35
• Culture and maintenance of <i>H. theivora</i>	35
• Rearing techniques and study of Biology	35
• Feeding behaviour	37
• Oviposition preference	38
• Determination of relative toxicity of insecticides against <i>H. theivora</i> in different subdistricts of the Dooars	39
• Persistence of residual toxicity	41
• Ovicidal activity of different classes of insecticides against eggs of <i>H. theivora</i>	43
• Comparison of life cycle traits of population <i>H. theivora</i> infesting organic and conventional tea plantations, with emphasis on endosulfan resistance	44
• Estimation of total body lipid of <i>H.theivora</i>	47
• Screening and utilization of phytochemicals from locally growing plants/herbs	47
• Field application and efficacy.	50
• Neem based pest management	52
• Effects of synergists on the toxicity of insecticide	54
• Effects of carrier water on insecticide efficacy against <i>H. theivora</i>	54

➤ Result and Discussion	56
• Records and evidences of population change of <i>Helopeltis theivora</i> in the Dooars	57
• Use pattern of insecticides in tea in different tea growing sub districts of the Dooars	60
• Influence of abiotic factors and seasonal abundance of <i>H. theivora</i>	64
• Life cycle pattern of <i>H. theivora</i> in different seasons of the Dooars agro-climate	67
• Comparative life cycle pattern of <i>H.theivora</i> on tea (<i>Camellia sinensis</i>) and <i>Mikania micrantha</i>	73
• Feeding behaviour of <i>H. theivora</i>	76
• Oviposition preference of <i>H. theivora</i>	86
• Determination of relative toxicity of insecticides against <i>H. theivora</i> in different subdistricts of the Dooars	89
• Persistence of residual toxicity of some commonly used insecticides against tea mosquito bug <i>H. theivora</i> infesting tea in the Dooars	98
• Ovicidal activity of different pesticides against eggs of <i>H. theivora</i>	118
• Comparison of life cycle traits of <i>H. theivora</i> infesting organic and conventional tea plantations, with emphasis on endosulfan resistance	121
• Variation in endosulfan susceptibility and body lipid content of <i>H. theivora</i> in relation to the use pattern of the insecticide in the Dooars tea plantation	126
• Colour variation in <i>H. theivora</i> of Dooars	130
• Screening the ant-insect properties of common native botanicals against <i>H. theivora</i> in the Dooars	132
• Utilization of different solvent extract of <i>Clerodendron infortunatum</i> Linn, (Verbenaceae) for the management of <i>H. theivora</i> in tea plantation	136
• Relative insecticidal value of azadirachtin content and Bioefficacy of neem formulations against <i>H. theivora</i>	143
• Bioefficacy of neem formulations combined with deltamethrin and endosulfan against <i>H. theivora</i> in the Dooars condition	147
• Effects of synergists on the toxicity of insecticides	149
• Effects of carrier water on insecticide efficacy against <i>H. theivora</i>	153
➤ References	158
➤ Summary	191
➤ Suggestion on management strategies of <i>H. theivora</i>	205
➤ Acknowledgement	215
➤ Annexure	217
➤ List of published / accepted papers related to tea pest	226
➤ Reprints of published papers relevant to the topic of the thesis	229
