ACKNOWLEDGEMENT	i
SUMMARY	vi
LIST OF TABLES	xvii
LIST OF FIGURES	xx
CHAPTER 1 - GENERAL INTRODUCTION	
1.1 Rationale	1
1.2 Objectives of the study	3
1.3 Historical account of red panda	4
1.4 Characteristic features of the red panda	5
1.5 Subspecies	9
1.6 Taxonomic classification	9
1.7 Remark	13
1.8 Organisation of the thesis	14
CHAPTER 2 - STUDY AREA-SINGHALILA NATIONAL PARK, DARJEELING	
2.1 Location in the Himalaya	15
2.2 Boundaries	17
2.3 Climate	17
2.3.1 Seasons	20
2.3.1.1 Premonsoon	20
2.3.1.2 Monsoon	20
2.3.1.3 Postmonsoon	20
2.3.1.4 Winter	21
2.4 Vegetation	21
2.4.1 Upper hill forest	21
2.4.2 Oak Hemlock forest	22
2.4.3 Alpine forest	22
2.4.4 Bamboo brakes	22

2.4.4 Bamboo brakes	22
2.5 Fauna	22
2.6 Geomorphology	23
2.7 Nature and distribution of water sources	23
2.8 Roads	25
2.9 Settlements	25
2.10 Tourists	27
2.11 Intensive study area	28
2.11.1 Description of the study area	28
2.11.1.1 Site 1(Gairibans)	28
2.11.1.2 Site 2 (Kaiyakatta-Kalipokhari)	28
2.11.1.3 Site 3 (Sandakphu)	29
2.11.2 Vegetation zonation with elevation	29
CHAPTER 3 - VEGETATION DESCRIPTION OF STUDY AREA	
3.1 Introduction	30
3.2 Methods	31
3.2.1 Vegetation sampling	31
3.2.2 Categorization of size classes	32
3.2.3 Phenology	33
3.3 Analyses	33
3.4 Results	35
3.4.1 Tree layer and classification	35
3.4.2 Sapling and seedlings	44
3.4.3 Shrubs	47
3.4.4 Bamboo	47
3.4.5 Disturbance	51
3.4.6 Forest structure	53
3.4.7 Phenology	57
3.5 Discussion	61
3.5.1 Classification	61
3.5.2 Functional spectrum of the forest	61

3.5.3 Structure and composition of the forest	62
---	----

CHAPTER 4 - DISTRIBUCIÓN, ABUNDANCE AND STATUS

4.1 Introduction	68
4.2 Current distribution of the red panda	70
4.2.1 Nepal	72
4.2.2 India	72
4.2.3 Bhutan	73
4.2.4 Burma	73
4.2.5 China	73
4.2.6 Protection status	74
4.3 Methods	74
4.3.1 Survey	74
4.3.2 Interviews	75
4.3.3 Intensive study	75
4.3.4 Indirect evidences	76
4.3.5 Direct sightings	78
4.3.6 Secondary information	78
4.3.7 Extensive surveys	79
4.4 Analyses	79
4.4.1 Estimation of red panda in the study area	79
4.5 Results	80
4.5.1 Survey	80
4.5.2 Intensive study	81
4.5.2.1 Direct sightings	81
4.5.2.1.1 Observations	83
4.5.2.1.2 Encounter rate of red panda in the three study area	88
4.5.2.1.3 Encounter rate of red panda in the three vegetation zones	88
4.5.2.2 Dung/Pellet-groups	88
4.5.2.2.1 Encounter rate in the three study sites	88

4.5.2.2.2 Encounter rate in the three elevational or vegetation zones	90
4.5.2.3 Indirect evidence of red panda in random plots	92
4.5.2.4 Group size	92
4.5.2.5 Estimation of red panda numbers in the study area	92
4.5.2.6 Relation between encounter rate of pellet group and red panda sightings	95
4.6 Discussion	95
4.6.1 Indirect evidences	95
4.6.2 Distribution and abundance	96
4.6.2.1 Distribution and abundance in the three study sites	97
4.6.2.2 Distribution and abundance in the vegetation zones	97
4.6.2.3 Distribution of red panda in the entire National Park	98
4.6.3 Status of red panda in the study area	99
 CHAPTER 5 - HABITAT USE	
5.1 Introduction	103
5.2 Methods	105
5.3 Analyses	106
5.4 Available habitat types	108
5.5 Results	110
5.5.1 Habitat selection	110
5.5.2 Habitat use index	110
5.5.3 Seasonal pattern of habitat use	115
5.5.3.1 Premonsoon	116
5.5.3.2 Monsoon	117
5.5.3.3 Postmonsoon	118
5.5.3.4 Winter	123
5.5.3 Use of some habitat attributes	127
5.5.3.1 Aspect	127
5.5.3.2 Altitude	128

5.5.3.3 Use of various substrates	131
5.5.3.4 Tree species used	131
5.6 Discussion	131
5.6.1 Habitat selection	136
5.6.2 Seasonal pattern of habitat use	138

CHAPTER 6 - FEEDING ECOLOGY

6.1 Introduction.	143
6.2 Methods	147
6.2.1 Faecal analysis	148
6.2.2 Phenology of food plants	148
6.2.3 Biomass and density of bamboo	148
6.2.4 Nutritional analysis	149
6.3 Results	149
6.3.1 Seasonal food use	149
6.3.2 Feeding ecology in the temperate and subalpine zone	151
6.3.3 Availability and distribution of food	152
6.4 Discussion	156
6.4.1 Feeding ecology in the temperate and the subalpine zones	156

CHAPTER 7 - CONSERVATION PROBLEMS

7.1 Introduction	162
7.2 Management history of the Singhalila National Park	163
7.3 Socio-economic profile	166
7.3.1 Settlements	167
7.3.2 Occupation	168
7.3.2.1 Cattle herding	168
7.3.2.2 Agriculture	169
7.3.2.3 Tourist activities	169
7.3.2.4 Liquor making	169
7.3.2.5 Catering to local travelers	169
7.3.2.6 Government jobs	169

7.3.2.7 Other	170
7.4 Dependence of the people on the forest and its Impact	170
7.4.1 Grazing	170
7.4.2 Firewood use	172
7.4.3 Extraction of minor forest products	172
7.5 Tourism and its impact	173
7.5.1 Singhalila as a trekking destination	173
7.6 Distribution and abundance of red panda in the Singhalila National Park	177
7.7 Present management practices	178
7.8 Transboundary conservation	179
BIBLIOGRAPHY	183
APPENDIX	
Appendix I Summary of The Preliminary survey conducted in the Singhalila National Park	203
Appendix II Summary of extensive survey	204
Appendix III Trees, shrubs and creepers marked for phenological study	205
Appendix IV Some of the civic amenities available to the locals of the buffer settlements	207
