

ACKNOWLEDGEMENT

It is a great pleasure to express my deep sense of gratitude to my Supervisor, Dr.B.N.Chakraborty, Department of Botany, University of North Bengal for his valuable guidance, unfailing help and constant encouragement throughout the execution of this work. I would like to express my heartfelt gratitude to Dr.Usha Chakraborty, Department of Botany, University of North Bengal for her ungrudging help and advice. I am also grateful to the Director, Centre for Life Sciences and the Head of the Department of Botany, University of North Bengal for providing necessary facilities. I am indebted to all the teachers of this Department for their help at various times.

I extend my sincere thanks to Professor N.T.Keen, Department of Plant Pathology, University of California, U.S.A. for kindly sending the authentic sample of glyceollin and Professor E.W.B.Ward, Research Centre, Agriculture, Canada, Ontario and Professor J.E.DeVay, Department of Plant Pathology, University of California, U.S.A. for providing valuable literatures. I also record my sincere thanks to the Director, Pulses and Oil seeds Research Station, Berhampore for sending soybean seeds and to the Head, Division of Mycology and Plant Pathology, Indian Agricultural Research Institute, New Delhi for providing the fungal cultures.

I wish to record my thanks to all the Research Fellows of Plant Pathology Laboratory, Department of Botany for their help and co-operation. Thanks are due to Asis Nag for typing this thesis with care. I am also grateful to my parents and my wife for their constant encouragement.

Baneswar Chandra Shil.
